

Data Center Overview

The Data Cave Difference

Security

- Fenced perimeter and gated entrance
- Card and biometric access control
- 24/7 video surveillance
- No ground floor windows

Infrastructure

- Fully 2N redundant
- Purpose-built 86,400 square feet
- Bunkered building-in-building design
- 200+ mph (EF5 tornado) wind rated
- Private 1,300 square feet data suites

Connectivity

- Multiple fiber conduits
- Carrier neutral
- No cross-connect fees
- Multiple carriers including AT&T, Verizon and Level3

Power

- 10MW, plus capacity for expansion
- Dual utility feeds, transformers, generators and flywheel UPS systems
- Metered power offering

Reliability

- Immediate support response time
- Technical work completed in-house
- SAS70/SSAE16 audited

Dedicated Team

We love what we do and it shows. Our team of talented, experienced professionals is committed to ensuring that each of our clients receives the best possible customer service. We guarantee you a single point of contact for all interactions. Regardless of the request at hand, one phone call will put you in touch with a member of our team who is familiar with you and your account.

Data Cave Overview

Data Cave is a full service, Tier IV compliant data center located in Columbus, Indiana. The Data Cave facility was built from the ground up to give our clients peace of mind in trusting their critical IT infrastructure to our team. Data Cave's data suite design allows for optimum control and security for clients of any size. Our advantage is simple: a world class state of the art data center with high levels of security, unparalleled uptime capabilities, and hardened protection from the elements.

Customized Services

Data Cave creates the most efficient and cost-effective strategy by customizing a combination of services to achieve your goals.

Colocation - Our data suites provide an expansive amount of physical space, power, and connectivity, enough to house any IT infrastructure.

Business Continuity - Our dedicated 240 seat workspace serves as a full backup work site. The space is secure, network-connected, and available 24/7.

Offsite Data Backup - We provide real time data replication and backup to a secure storage network within our data center. We have all of your devices covered.

Disaster Recovery - Options include hot site backup with real time replication, cold site backup, and office space and support.

Connectivity - We offer a diverse range of connectivity options, with diverse paths that allow for instant failover and high availability.
