5

symptons that indicate you need to automate your SAP system copy process...

1 Development and test regularly come to a standstill...

2 Non-production systems are unavailable for days, even weeks...

3 BASIS admin spend too much time performing system copies...

4 Sheer volume of sensitive data is forcing quality and security risks...

5 Too much time spent resolving misconfigured parameters...

An automated ✓
SAP system copy process can...

1 Reduce wait times by up to **90%**

2 Make systems available 2 x faster

3 Run with up to **90%** fewer resources

4 Perform dev, test and training using **100%** real-life data with security and privacy

5 Ensure parameters are correct **100%** of the time
