

Are you watching
your profits
go to waste?

maratek
solvent saver

A clear glass beaker is shown, partially filled with water. A stream of water is being poured into the beaker from a tube at the top, creating a splash and numerous small bubbles that rise through the water. The text "The solution is clear" is printed in a black, sans-serif font in the center of the beaker. The beaker is set against a light blue background and is reflected on a surface below it.

The
solution
is
clear

You use a lot of solvent. You spend a lot of money dealing with the waste. To stay competitive, you've got to keep costs low. But to keep regulators happy and customers and investors interested, you've got to demonstrate "green" initiatives. What can a company do?

See for yourself. Our reclaimed solvent is virtually indistinguishable from the virgin product. Maratek's Solvent Saver, with award-winning, proven technology, will help you reduce the amount of solvent you use and the amount of waste you produce. The benefits? Substantial cost savings that can be passed on to your customers and reduced VOC generator status that makes your environmentally responsible operation attractive to clients and investors.

Did you say “cost savings”?

No, we said “**substantial** cost savings”! One drum of virgin solvent on the press results in two drums of waste that cost over \$300 to dispose of. By recycling that solvent, you end up with nearly all of the solvent to reuse and less than \$20 of waste to ship. That’s a 95% reduction in hauling costs and a lot less new solvent to buy! Given those figures, the Solvent Saver could pay for itself in about 18 months.

Typical savings using the Maratek Solvent Saver

The Solvent Saver comes in 4 different sizes to accomodate different capacities.

Solvent Saver Model	Monthly Solvent Purchases	Typical Annual Savings*†
Solvent Saver 20	1 – 2 Drums	\$ 9,200 – 18,400
Solvent Saver 50	3 – 5 Drums	\$ 27,600 – 46,000
Solvent Saver 100	6 – 14 Drums	\$ 55,200 – 128,800
Solvent Saver 300	15 – 42 Drums	\$ 138,000 – 386,400

* from reduced solvent purchases and waste disposal

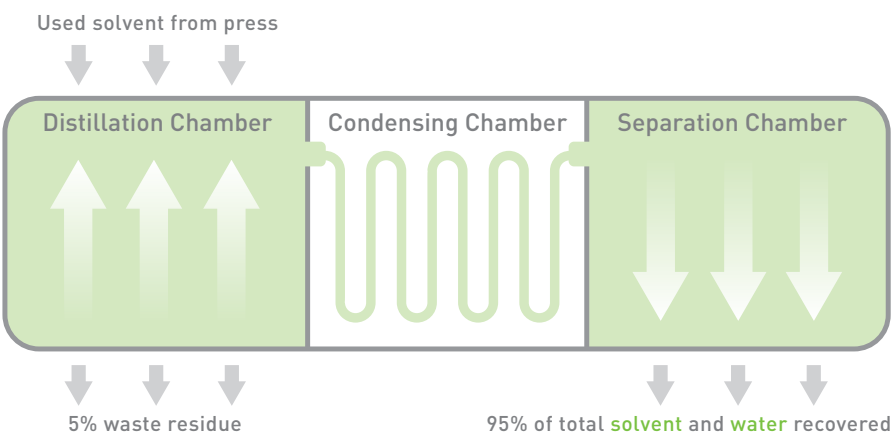

† based on \$8/gal solvent purchase price and \$3/gal waste disposal price

**With the Solvent Saver,
you can run 1 drum of solvent
through your press over 10 times
before you have 1 drum of waste to ship.**

How does it work?

The Maratek Solvent Saver uses a multi-stage vacuum distillation process that separates solvent into its components at lower-than-boiling point temperatures. Any waste residues are self-contained within the unit, distilled water can be usually sent down the drain and the reclaimed solvent is ready to go back on press.

The Solvent Saver is an off-press automated machine that, once installed, needs very little attention. Switching out drums and using our touch-sensitive control screen is virtually all the labor required. It has a small footprint and because it operates at low temperatures, its explosion-proof design is safe for installation in the pressroom in most cases.

Trust our experience

Maratek has been in business for over 30 years and we continue to grow and adapt to an ever-changing printing industry. As market leaders in solvent recycling for the last 10 years, we take pride in providing our customers throughout North America with reliable, innovative, and cost saving recycling solutions. The Maratek Solvent Saver is the proud recipient of the 2005 InterTech Award for Technological Excellence.
