EKATU Connecting People With Technology

Technology Workshop HIPAA – Security Risk Assessment: What's Next?

December 12, 2013

Welcome!

- Thank you for joining us today.
- In today's call we'll cover the Security Assessment and next steps.
- If you want to follow from your office, go to <u>www.ekaru.com</u> / Go to "What's New" near the bottom of the page. Presentation will open in a browser, click the down arrow in nav bar to advance slides.

2

Format

- Given the number of people on the line today, this is a "listen only" call.
 - (Reason, cut down on ambient noise, avoid "call on hold music" – a bit tough though, because I can't hear you!)
- If you have questions, please eMail to <u>knoran@ekaru.com</u> and we will try to include Q&A at the end of the call – we will be reviewing email live during the call.
- Call 978-692-4200 for help.

- Help your practice understand "what's next" after your Security Risk Assessment
- Review most common gaps
- Save you time in the process

These materials do not constitute legal advice and are for educational purposes only. The information in this webinar is based on current federal law and subject to change based on changes in federal law, the effect of state law or subsequent interpretative guidance.

Security Risk Assessment

Security Risk Assessment

- Needs to be complete by end of year
- Involves identifying risks to confidentiality, integrity, and availability of patient information

NEXT STEPS:

REMEDIATION

Don't wait, get started now!

HITECH

The Health Information Technology for Economic and Clinical Health (HITECH) Act provides the Department of Health & Human Services (HHS) with the authority to establish programs to improve health care quality, safety, and efficiency through the promotion of health IT, including electronic health records and private and secure electronic health information exchange.

Under HITECH, eligible health care professionals and hospitals can qualify for Medicare and Medicaid incentive payments when they adopt certified EHR technology and

use it to achieve specified objectives.

HIPAA, MA Data Security Law

Next Steps

Complete the Security Risk Analysis
80 Items

- Remediate gaps
- Complete/update your documentation

Completed Assessment

Folder includes:

- Your practice assessment
- Emerson Hospital assessment
- Resources:
 - HIPAA Privacy and Security Toolkit
 - HIPAA Business Associate Agreement SAMPLE
 - HIPAA Notice of Privacy Practices SAMPLE
 - HIPAA Security Rule: Encryption FAQs

8

Next Steps: Security Policy

Security Policy Document

- Biggest gap in all assessments completed so far is either no written documentation, or major updates needed
- Employee manual is good, but not sufficient
- Must have a written document not enough to just "do" the requirements.

Written Security Policy

- Sample Document is available from HealthIT.gov
- Sample is long 85 pages
- Download on line, or we can email a copy.
- Say what you do, and do what you say"

Written Security Policy

Sample – Table of Contents:

	Partner	
ess	Microsoft [*]	f in 💽
<u>2.</u>	.8 Transferring Software and Files between Home an	<u>d Work 17</u>
<u>2.</u>	.7 Transfer of Sensitive/Confidential Information	17
<u>2.</u>	.6 Report Security Incidents 17	
<u>2.</u>	.5 Reporting Software Malfunctions 16	
<u>2.</u>	.4 Internet Access 16	
<u>2.</u>	.3 Electronic Communication, E-mail, Internet Usage	¹² 14
<u>2.</u>	.2 Prohibited Activities 14	
<u>2.</u>	.1 Employee Requirements 13	
2	Employee Responsibilities 13	
<u>1.</u>	.6 Confidentiality / Security Team (CST) 11	
<u>1.</u>	.5 Privacy Officer 11	
<u>1.</u>	.4 Applicable Statutes / Regulations 11	
<u>1.</u>	.3 Acronyms / Definitions 10	
<u>1.</u>	.2 Scope 9	
<u>1.</u>	.1 Purpose 9	
1	Introduction 9	

Small Busine

Specialist

You

- Use Sample Security Policy as a starting point.
- Identify relevant items and customize for your practice
- Get help as needed

Business Associate Agreements

- Does any vendor have access to confidential patient data? Have you discussed HIPAA Security and HITECH requirements with such vendor(s)? Is an up-to-date Business Associate Agreement in place for each vendor that has access to ePHI?
- Many additional questions on this topic.
- Sample copy in your package

Ekaru Connecting People With Technology

- If you are required to operate in emergency mode, do you have procedures to enable you to continue critical business processes to protect the security of ePHI?
- Do you have a plan to temporarily relocate if you lose access to your physical location? Would ePHI be safeguarded at temporary locations? Are formal agreements in place for such a relocation?

Contingency Plans

- Have you trained staff on your contingency plan? Is there a contingency plan coordinator?
- Do you have an emergency call list?
- Have you identified situations in which your contingency plan must be activated?
- Is there a plan to restore systems to your normal operations?
- Have you tested your contingency plan?

Breach Notification

- The Breach Notification Rule requires covered physician practices to notify affected individuals, the Secretary of the U.S. Department of Health & Human Services (HHS) and, in some cases, the media when they discover a breach of a patient's unsecured PHI.
- Proper use of <u>encryption</u> can help avoid these notification requirements

Employee Training

Do you update your workforce members' training each time you develop and implement new policies and procedures? Do you document initial and continuing training?

Re-Purposing Equipment

- Do you destroy data on hard drives and file servers before disposing the hardware?
- Are workforce members trained as to the security risks of re-using hardware and software that contain ePHI?

Anti-Virus, Malware

- Have you installed anti-virus and other antimalware protection software on your computers? Do you use it to guard against, detect, and report any malicious software? Do you protect against spyware?
- Do workforce members update the virus protection software when it is routed to them?
- Do you prohibit workforce members from downloading software they brought in from elsewhere? (digital family photos, games, books, music, etc.)

- Don't "Guess" if systems are up to date
- Automatic reporting for compliance and peace of mind.
- Antivirus
- Anti-Malware
- Security Patching
- Third party Patching

Next Steps

Start your remediation NOW

- Plan ahead for the next few months to get it done
- Audits have started!

Myths...

From HealthIT.gov

The security risk analysis is optional for small providers.

False. All providers who are "covered entities" under HIPAA are required to perform a risk analysis. In addition, all providers who want to receive EHR incentive payments must conduct a risk analysis.

 Simply installing a certified EHR fulfills the security risk analysis MU requirement.

False. Even with a certified EHR, you must perform a full security risk analysis. Security requirements address all electronic protected health information you maintain, not just what is in your EHR. ...

Myths...

My EHR vendor took care of everything I need to do about privacy and security.

False. Your EHR vendor may be able to provide information, assistance, and training on the privacy and security aspects of the EHR product. However, EHR vendors are not responsible for making their products compliant with HIPAA Privacy and Security Rules. It is solely your responsibility to have a complete risk analysis conducted.

 My security risk analysis only needs to look at my EHR.

False. Review all electronic devices that store, capture, or modify electronic protected health information. Include your EHR hardware and software and devices that can access your EHR data (e.g., your tablet computer, your practice manager's mobile phone).

Microsoft Small Business Specialist

Myths...

I only need to do a risk analysis once.

False. To comply with HIPAA, you must continue to review, correct or modify, and update security protections.

Government Audits

- HHS Office of Civil Rights "OCR" has established a an audit protocol.
- 170 potential audit areas
- Available on-line: <u>http://www.hhs.gov/ocr/privacy/hip</u> <u>aa/enforcement/audit/protocol.html</u>

Significant Penalties

Civil Penalties:

HIPAA Violation	Penalty Range	Annual Maximum
Individual did not know (and by exercising reasonable diligence would not have known) that he/she violated HIPAA	\$100 - \$50,000 per violation	\$1.5 million
Individual "knew, or by exercising reasonable diligence would have known" of the violation, but did not act with willful neglect	\$1,000 - \$50,000 per violation	\$1.5 million
HIPAA violation due to willful neglect but violation is corrected within the required time period	\$10,000 - \$50,000 per violation	\$1.5 million
HIPAA violation is due to willful neglect and is not corrected	\$50,000 per violation	\$1.5 million

Significant Penalties

Criminal Penalties:

- Covered entities and specified individuals whom "knowingly" obtain or disclose individually identifiable health information in violation of the HIPAA requirements face a fine of up to \$50,000, as well as imprisonment up to one year.
- Offenses committed under false pretenses allow penalties to be increased to a \$100,000 fine, with up to five years in prison.
- Offenses committed with the intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain or malicious harm permit fines of \$250,000, and imprisonment for up to ten years.

Technology Requirements

 Physicians should also note that HIPAA is considered a "floor,". States such as Massachusetts have requirements that go above and beyond what the federal government requires. (MA Data Security Law)

Technology requirement #3

- "(3)Encryption of all transmitted records and files containing personal information that will travel across public networks, and encryption of all data containing personal information to be transmitted wirelessly."
- Do not email personal information. Instead use encrypted email or encrypted file transfer.
- Maintain wireless network encryption.
- WPA <u>NOT</u> WEP Encryption
- Password protection is NOT encryption!

On-Demand Encryption

Rapid and cost-effective options to secure collaboration with business partners and clients

- Rapid project ramp up and get going fast
- Lowest cost on-demand service
- Minimized IT overhead
- Full integration with on-premise solution
- Email, Files and Documents protected wherever they go

View the Voltage SecureMail experience >

Easy to Use Email, File and Document Encryption

Protect client confidentiality with easy to use, on-demand email, file and document encryption

- Designed for Business Professionals
- Easy to use, no setup required
- No software and no purchase needed for recipients
- Integrates with Microsoft Office 2007
- Low cost subscription

Microsoft. Small Business Specialist

Technology requirement #5

- "Encryption of all personal information stored on laptops or other portable devices*;"
- We recommend TrueCrypt or PGP encryption to mount encrypted drives.
- Full disk Encryption
- Hardware encryption if available

* If technically feasible

Technology Requirement #5

- Do <u>all</u> portable devices need to be encrypted? - YES – whenever technically feasible. Also, DVDs and flash drives should be encrypted.
- Laptops: PGP or Truecrypt You MUST remember your encryption key!

iPhone Encryption:

http://support.apple.com/kb/ht4175

Data protection is available for devices that offer hardware encryption, including iPhone 3GS and later, all iPad models, and iPod touch (3rd generation and later). Data protection enhances the built-in hardware encryption by protecting the hardware encryption keys with your passcode. This provides an additional layer of protection for your email messages attachments, and third-party applications.

37

iPhone Encryption

Enable data protection by configuring a passcode for your device:

Tap Settings > General > Passcode.

- Follow the prompts to create a passcode.
- After the passcode is set, scroll down to the bottom of the screen and verify that "Data protection is enabled" is visible.

Passcode tips

- Use these passcode settings to maximize passcode security:
- Set Require Passcode to Immediately.
- Disable Simple Passcode to use longer, alphanumeric passcodes.
- Enable Erase Data to automatically erase the device after ten failed passcode attempts.

Security in the news...

Microsoft Patch Tuesday brings critical Explorer, Outlook fixes

Update Flash, Shockwave ASAP! Adobe also patches Acrobat and Reader

'Master key' to Android phones uncovered

A "master key" that could give cyber-thieves unfettered access to almost any Android phone has been discovered by security

39

Day the Microsoft releases security patches for all products. Second Tuesday of the month

Security TechCenter > Security Bulletins > Microsoft Security Bulletin Summary for September 2013

Microsoft Security Bulletin Summary for September 2013

Published: Tuesday, September 10, 2013

Version: 1.0

This bulletin summary lists security bulletins released for September 2013.

Support ends for Windows XP

Desktop operating systems	Latest service pack End of extende support		
Windows XP	<u>Service Pack 3</u>	<u>April 8, 2014</u>	
Windows Vista	Service Pack 2	April 11, 2017	
Windows 7 *	Service Pack 1	January 14, 2020	
Windows 8	Not yet available	January 10, 2023	

Start planning <u>now</u> if you have Windows XP systems

Windows XP... planning

- As a general rule, we don't recommend updating just the operating systems for PCs older than three years old.
- Best solution in most cases is a replacement PC

"Third Party" Patching

- Adobe Acrobat
- Adobe AIR
- Adobe Flash Player
- Adobe Reader
- Adobe Shockwave Player
- Apple iTunes
- QuickTime
- Mozilla Firefox
- Java Development Kit
- Java Runtime Environment

UNDERSTAND Risks

- DOCUMENT Policies "Say what you do"
- COMPLY "Do what you say"
- TRAIN
- REVIEW Conduct a risk assessment at least annually
