

Instant Remote Visualization. Access Anywhere.

DATA SHEET

Experience the power of Teradici PCoIP® Workstation Access Software for Dell Precision

“With PCoIP Workstation Access Software for Dell Precision, customers can enable their employees to instantly and securely access their workstations from anywhere with a rich remote user experience across the network. The ability to access applications from Windows devices will offer a new level of flexibility and productivity for mobile workers, with iOS and Android support on track for release in the coming months. This new software option builds on our existing remote access solutions, so we’re excited to bring the benefits of this easy-to-deploy solution to Dell Precision workstation customers.”

A New Level of Flexibility for Remote Access

Imagine, within minutes, you can enable your workforce to connect remotely to their workstation. With the Teradici PCoIP Workstation Access Software, IT can successfully deliver remote graphics and applications to CAD/CAM designers, architects, engineers and construction managers. The solution is simple to deploy and manage.

Seamless user experience

- Delivers rich remote access workstation performance
- Mobilizes your workforce and increases productivity

Enables secure access

- Protects corporate IP against loss or theft
- Only transmits pixels, not data

Realize remote access simplicity

- Easy to install allowing for rapid deployment and easy ongoing management with existing tools
- Enables support for BYOD strategy
- Limits IT investment and complexity

Teradici PCoIP Workstation Access Software

The Teradici PCoIP Workstation Access Software can be installed on your Dell Precision workstation at your desk, to enable access from any compatible device. The solution maintains 3D API compatibility (OpenGL and DirectX). The technology is compatible with any GPU hardware, and is optimized for NVidia K2000 or higher GPUs (GRID SDK 2.2).

Mobilize employees with Remote Access from Anywhere

Empower staff by instantly meeting the needs of today's mobile workforce. PCoIP Workstation Access Software allows users to connect to their workstation remotely from anywhere.

Enhanced Data Security

With the Teradici PCoIP Workstation Access Software, IT departments can provide additional security measures to protect corporate IP and sensitive internal data while enabling remote access, either over LAN or WAN. With PCoIP technology, all transmissions are encrypted and authenticated, and only pixels, not data, are sent from the remote workstations to ensure a high level of data security.

Provide your users with the freedom to use their own devices and be productive from anywhere - our solution can meet the demands of BYOD, and mitigates any security risk associated with remote data storage on PCs and laptops.

Set up is easy, and the software can be installed in a matter of minutes, ensuring users receive rapid remote access to their workstation.

Key Benefits of PCoIP Workstation Access Software

- High quality images** The Teradici PCoIP protocol compresses and encrypts the pixels to enable outstanding remote workstation performance
- Secure Access** Highly flexible solution allows for remote access in a conference room, at home or on-the-go from anywhere around the world
- Direct connect** Easy to deploy and doesn't require set up of a third party broker to get started
- Allows for local collaboration** Local workstation user can share their screen with one remote user leveraging the same Windows account
- Application independent** PCoIP technology sends pixels, not data, regardless of the application being used and types of content being generated

TECHNICAL SPECIFICATIONS

	HOST	CLIENT
Supported operating systems	Windows 7 Professional, Enterprise 64-bit Windows 8.1 Professional, Enterprise 64-bit	Windows XP Professional 32-bit, 64-bit Windows 7 Professional 32-bit, 64-bit Windows 8.1 Professional, Enterprise 64-bit Mac OS X 10.7 or later
