Looking For The Right Solution?
Start By Selecting The Right Partner ...

“At Torque Transmission, our philosophy is simple: provide our customers with the highest-quality products delivered right the first time, on time, every time.”

John N. Rampe, CEO
Torque Transmission

Fractional Horsepower Pulleys, Gear Drives and Thrust Bearings

Torque Transmission

For more than 50 years, design engineers around the world have relied on Torque Transmission Mechanical Drive Components to solve their fractional horsepower applications. Why? They know that Torque Transmission can meet their specific design requirements ... often with an off-the-shelf solution. And when an off-the-shelf solution is not available, those engineers appreciate the advantages a company with in-house engineering and tooling resources has to offer.

Torque Transmission customers call upon our people’s experience and expertise during every step of the design process. They know that partnering with us early on in the process will yield superior products.

“**We’re easy – tell us what you want, what quantity and that’s it. We won’t ask you to compromise on design. If we don’t have it, we’ll make it for you.**”

John W. Rampe, President, Torque Transmission
Fractional Horsepower Pulleys, Gear Drives and Thrust Bearings

We offer off-the-shelf availability on popular standard products. We are able to modify or customize any of our products to meet your specific needs quickly and economically. Or we can design to your specifications.

Pulley Line
Timing Pulleys (XL, L, 3mm, 5mm, 8mm HTD, 2MR, 3MR, 5MR PGGT2), Variable-Speed Pulleys, Sprockets, Couplings, 1/4” V-Belt Pulleys

Gear Box Line
• Right-Angle Worm Gear Speed Reducers
• 1/3 HP Right Angle Miter Gear Drive
• 1/8 HP Right-Angle Helical Gear Drive

Thrust Bearing Line
• Inch: 1/8 ID to 5.5” ID
• Metric: 4mm ID to 28mm ID
• Carbon or Stainless Steel
We Are
• Competitive Premier OEM Supplier
• ISO 9000-2008
• Lean Manufacturing Practices
• Very Short Lead Times
• 98% On-Time Delivery
• Made in the USA

Advantages of Torque’s Products
• Light Weight/Low Inertia (molded plastic)
• Good in Corrosive Conditions
• Naturally lubricated thrust bearings
• Zero Magnetic Signature

What You Get Beyond the Product
• Speed to Market
• Quality Products
• Design Assistance
• Engineering Expertise

You Set The Standard
• Products are designed to your exact specifications.
• A complete set of manufacturing drawings is provided.
• The bill of manufacturing details every step of the manufacturing process, including quality control.

Put our expertise to work on your next application. Let’s talk.
