i4 from Jonas Fitness™

Club Management Software for Your Business Needs

An integrated club management solution for clubs of all sizes – from a single, trusted and experienced global provider.

Choosing a club management solution that meets your business needs can seem daunting. Even if you operate multiple clubs in multiple geographies, you should be able to find a solution that can be tailored to the specific needs of each club yet provide standardized functionality across locations. Jonas Fitness can make your decision an easier one. If you want to share data between multiple sites, or if you want to provide services such as “My Account” to your members, we recommend i4.

In addition, with i4 you will avoid a large up-front investment. Jonas Fitness offers a comprehensive and scalable solution that combines the best of club management software, member management services and payment processing services. When these three vital club functions are fully integrated, your club reaches the peak in profitability and operational efficiency.

Club Management Software that is Flexible and Scalable

i4 is an Internet club management software solution that automates the process of operating your club by enabling you to

manage everything from prospecting and contract management to membership management, front desk check-in and accounting to scheduling and locker assignments. It is flexible to allow you to select the functionality to fit your club’s current size and scalable to enable you to add functionality as your club grows. i4 is flexible enough to integrate with your other back office applications such as billing and payment collection.

Adding a solution to your club management software capability that enables you to manage your member data, such as our member management services, further increases your operational efficiencies and membership potential. You can generate individual club reports that provide all of the necessary information to manage your club’s billing, member services and accounts receivable – straight from your software without managing all the complexities of these functions yourself. Additionally, you gain valuable information for targeted marketing to increase club membership and member retention.

A Comprehensive and Flexible Solution from a Single Provider

When it comes to total club management, Jonas Fitness enables you to have it all: a flexible, interactive Internet software solution connected directly to your website with access to data in real-time; outsourced back-office billing and contract management services; a reliable payment processing solution that increases your predictable cash flow and reduces your overhead; and the freedom to put your energy toward making your customers happy.

Jonas Fitness has nearly 30 years of proven expertise and innovation to offer a complete club management solution – for clubs of any size – and guaranteed, reliable payment processing services to thousands of fitness clubs worldwide.

Features and Benefits of i4

Modules	Description
Front Counter	The Front Counter module provides all the functions necessary to automate the front desk in your facility. With the click of a mouse, you can check in a member, sell an item at point-of-sale, add a guest or prospect, enroll a member in a class, view appointments and clock an employee in or out.
Configuration	The Configuration module allows you to set up your software to meet the needs of your health club. Examples of items you can configure include membership types, billing cycles, hardware, invoice categories, permission settings and payment categories.
Data Entry	The Data Entry module is the central location for all information pertinent to your club. It stores all data relating to members, products, employees, banks and groups.
Billing	The Billing module is designed to simplify the member billing process for you so you can concentrate on more important tasks and watch your fee income increase dramatically.
Reports	The Reports module provides a window into the performance of your club. You can choose from a list of standard reports or create your own using the “Memorized Reports” feature.
Contract Sales	The Contract Sales module is designed to simplify the sales process. Selling error-free, uniform membership contracts is a snap when you arm your staff with the Contract Sales module.
Marketing	The Marketing module is one of the most effective ways to increase the number of members who join your club. Using a systematic approach to marketing, tracking your prospects and reaching out to them has never been easier.
My Account	Empower your members by providing them with online access to their information. Members with an Internet connection can access their account online to obtain financial information, review payment history, make payments, communicate with the club and make requests to change account information. Put your members in charge of their account and allow your employees to focus on other revenue-generating tasks.
Employee Dashboard	Smart club managers provide their staff with the latest tools to increase productivity. The Employee Dashboard provides your employees with access to important data such as hours worked, sales tracking, appointment alerts and certification expiration dates.
Management Dashboard	The Management Dashboard is a real-time Web interface that provides important statistical data regarding your club’s performance. Examples include membership sales, member attrition, prospect conversions and billing projections.
Scheduling	The Scheduling Calendar allows you to schedule any activity or group in your club, including your managers, trainers, courts, tanning beds and more. You can create calendars for all sorts of uses in your club, each with its own start and stop time. With the click of a mouse, you can print calendars of events, activities or employee schedules.
Collections	The Collections module allows you to efficiently manage past due members and collect dues in a timely fashion through a systematic follow-up plan. The effectiveness of this system will pay dividends in faster payments, better tracking and increased cash flow.
BillMatrix®	This automated phone dialing system delivers customized phone messages to select members or prospects. It can be used for marketing purposes or to simply communicate important information to your members or prospects.
Workout Partner	Workout Partner tracks member workouts, prints progress reports and graphically displays results. Trainers can set up muscle groups, exercises and workout templates to quickly and easily tailor specialized workout prescriptions for each member.
