

# Continuum Recover

Backup and Disaster Recovery

## Disruptions and downtime are the quickest ways to lose customers.

With Continuum Recover you can ensure operations run smoothly no matter what challenges arise, while simultaneously reducing administrative overhead. Get all the tools and flexible, secure, always-on options you need to keep your customers' businesses humming such as persistent back-up to advanced restoration, cloud storage and real-time virtualization. Don't let a disaster ruin your day... or your business.

### New infrastructures, new answers

Adaptable BDR options nomatter what the budget. Scale for cloud, hybrid or on-premises and provide the means to safeguard critical data and restore business operations at hyper speed.

### Stop babysitting

Continuum Assist's certified NOC technicians handle the day-to-day management monitoring and troubleshooting of backups and recovery so you don't have to.

### Shield against ransomware

Localized virtualization and block level encryption secure data at rest, in transit, and in the cloud and provide the ultimate failsafe against malicious attacks.

### Deliver with confidence

Advanced automation, verification systems and block level storage for secure data replication ensures it works when you need it most.

"Since Continuum Recover is managed and maintained by Continuum's Network Operations Center technicians, we've been able to reduce the amount of time our in-house team spends managing the tool and monitoring backups."

Scott Oleson  
Senior vCIO & Director of IT,  
Frontier Business Products

## How it works

---

**Advanced data verification** with automated recovery-point integrity checks by Tru-Verify™ . Get time-lapse video of entire boot processes and give you maximum visibility and faster issue resolution.

---

**Continuous data protection** with block-level backups for more efficient storage and superior resource utilization. Less wear-and-tear, more data availability.

---

**Secure infrastructure** is powered by Continuum Cloud where data is encrypted while automatically replicating between multiple data centers to ensure reliability.

---

**Instant virtualization** provides recovery measured in minutes—not hours or days—meaning minimal downtime for clients.

---

**Multiple cloud storage options** provide pooled, fixed and long-term storage options available with the Continuum Cloud.

---

**SaaS data backup** done effortlessly to a save location and with unique search capability allowing quick data recovery.

# Continuum Recover

Backup and Disaster Recovery

## Why choose Recover

**Service integrity with automated, advanced verification systems**

**Continuous data protection**

**Block-level encryption**

**NOC-assisted disaster recovery and testing**

**Integrated and scale tested: proven on over 250,000 servers worldwide**

## Products

### Recover For Continuity

Our complete BDR solution built for MSPs that delivers speed, reliability, and continuous uptime and allows you to recover in minutes (not days).

### Recover For Backup

Flexible, scalable, and cost-effective data protection offering for clients with simple, straightforward data protection requirements.

### Recover For SaaS

Most complete coverage in the market for Office 365, including SharePoint and Teams, G Suite and more. Quickly integrate with the SaaS provider through our portal with a few simple steps and our system does the rest. Business critical data is backed up daily to a safe location and easily accessible and restored if needed.

### Recover For Archive

A long-term storage add-on designed for regulated clients that gives you policy-driven, off-site archival and replicates backup images in the public cloud or your own cloud via FTP.

### NOC Services

Continuum's certified NOC technicians to support your Recover services, decreasing your time spent managing backups by up to 90%. Offload day-to-day management, monitoring, troubleshooting and verification of backups or assist with cloud disaster recovery and full-site DR testing.
