# How to Create a Delivery Area using Google Maps
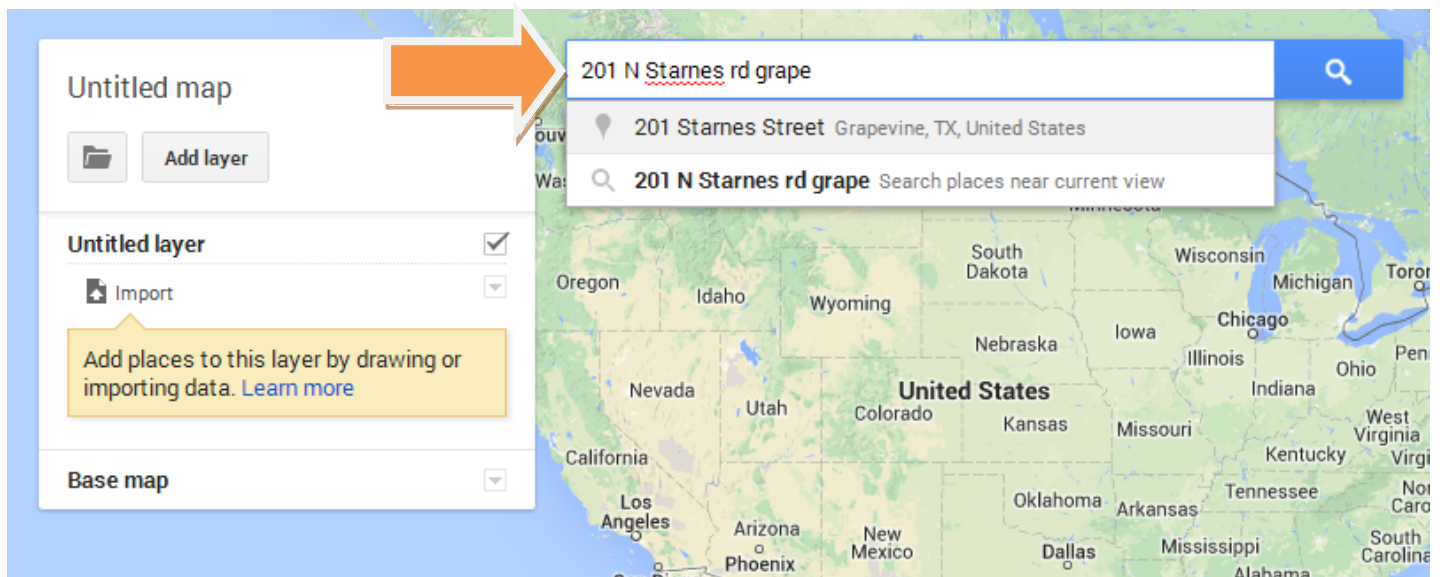

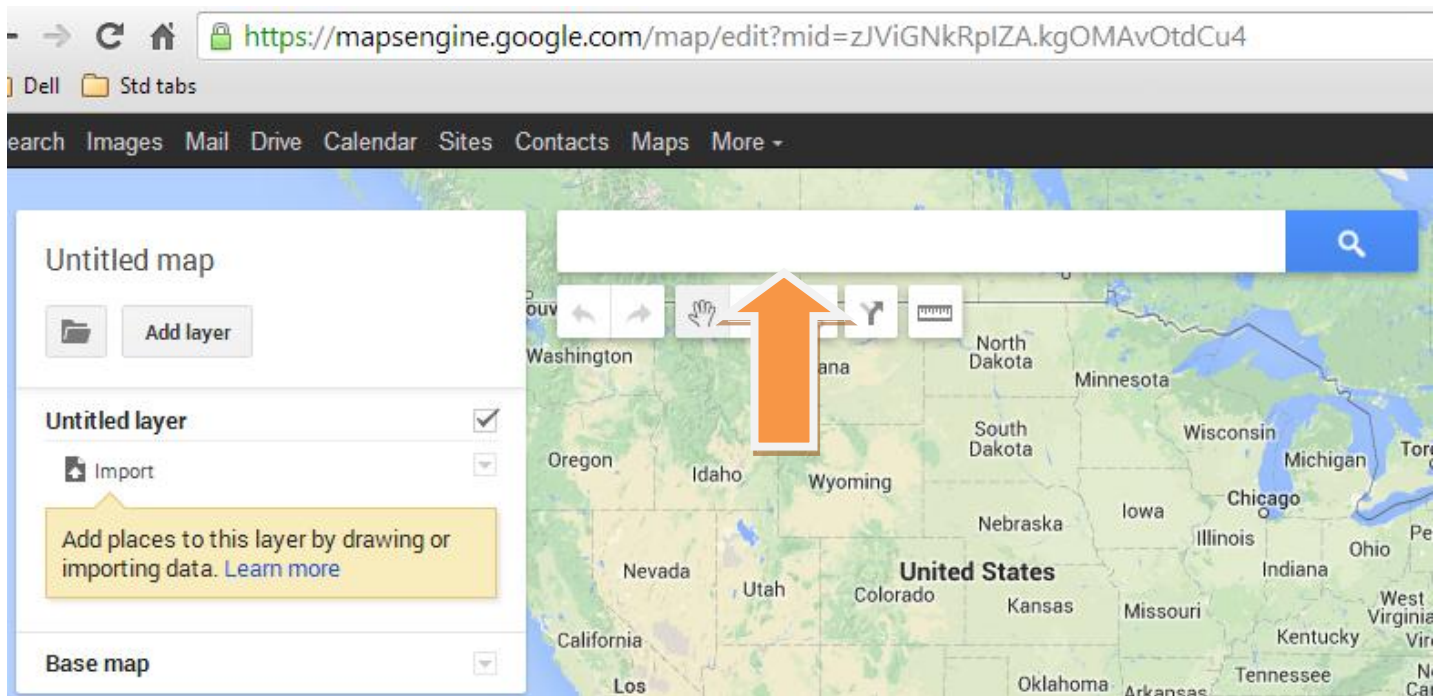

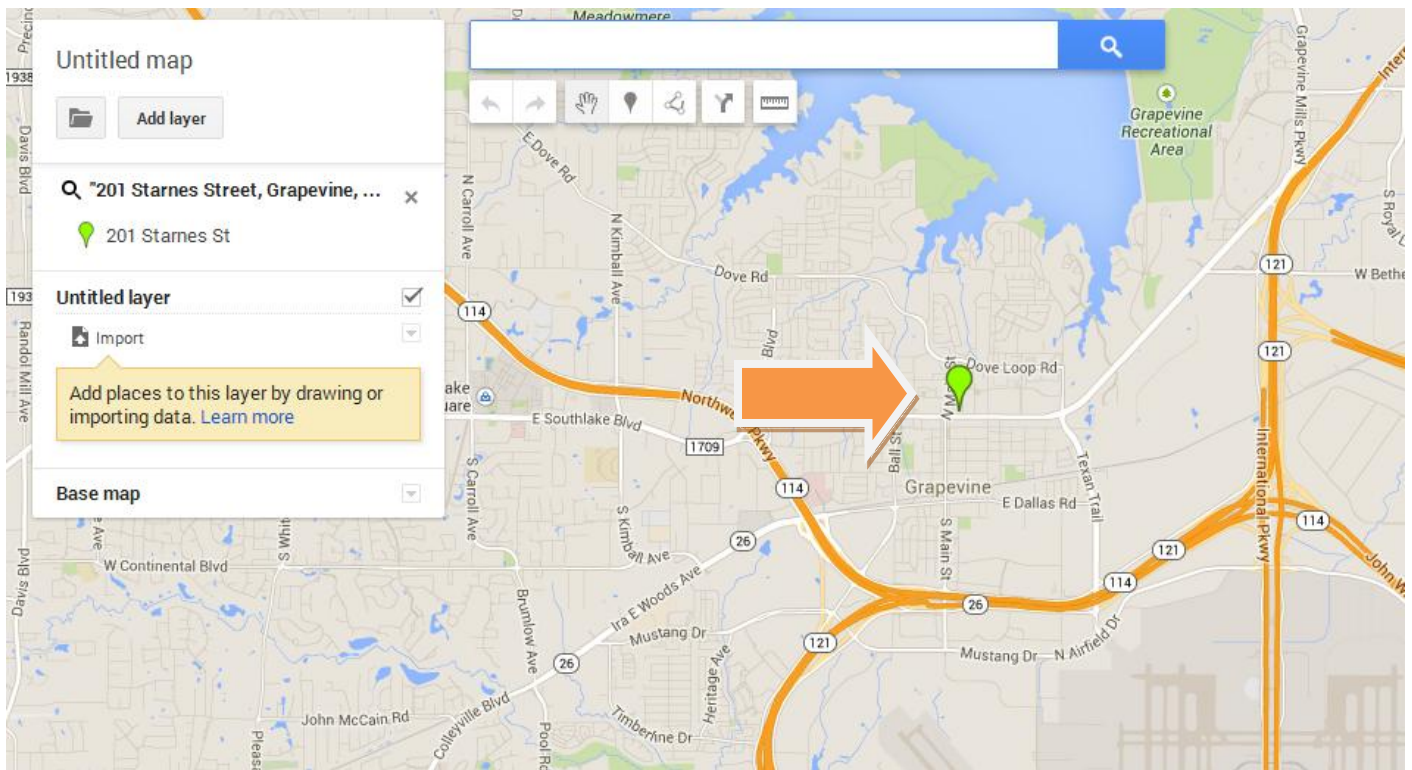

1. Open a web browser (ex: Firefox)
2. Please enter this web address into the browser https://mapsengine.google.com/map/
3. A box will be in the middle of the screen, click the blue <u>Create a new map</u> button.

4. Enter your restaurant address into the search bar on the top of the Google maps page and find your restaurants address.

5. Make sure that you can see your entire delivery area

6. Click the button below the maps search bar that looks like a uncompleted triangle. If you hold your mouse over the button it says <u>Draw a Line</u>
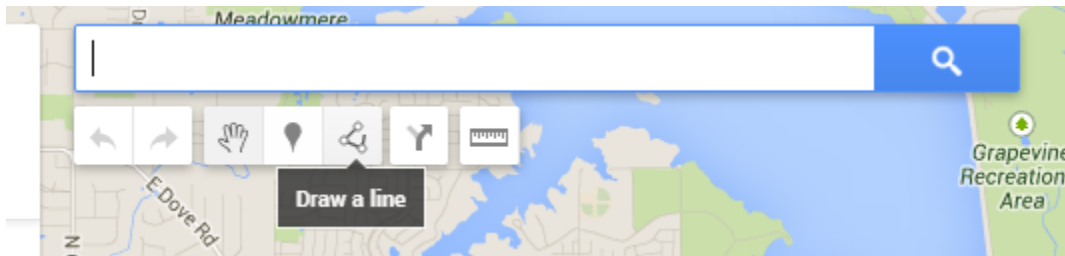

7. Create a delivery area using the draw a line tool. Find a good place to start and click the map to create a point. Use the draw a line tool to create a shape that is your delivery area. If you mess up doesn't start over you can change the lines when you have completed the shape.

8. Once the lines are connected it will say Polygon 1. You can rename this and save it. Verify that all of the points are in the right spot. You can move a line by clicking the dot and placing it on the map where it needs to be.
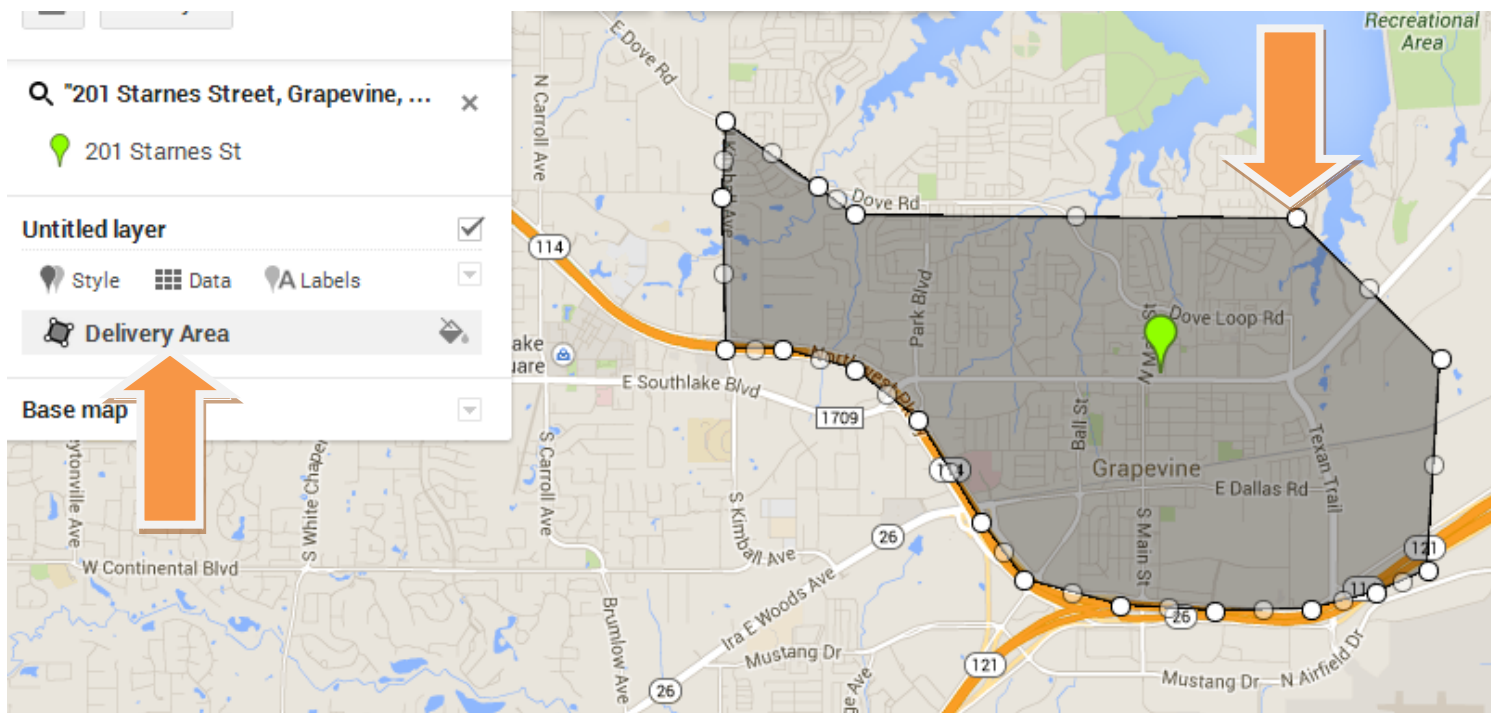

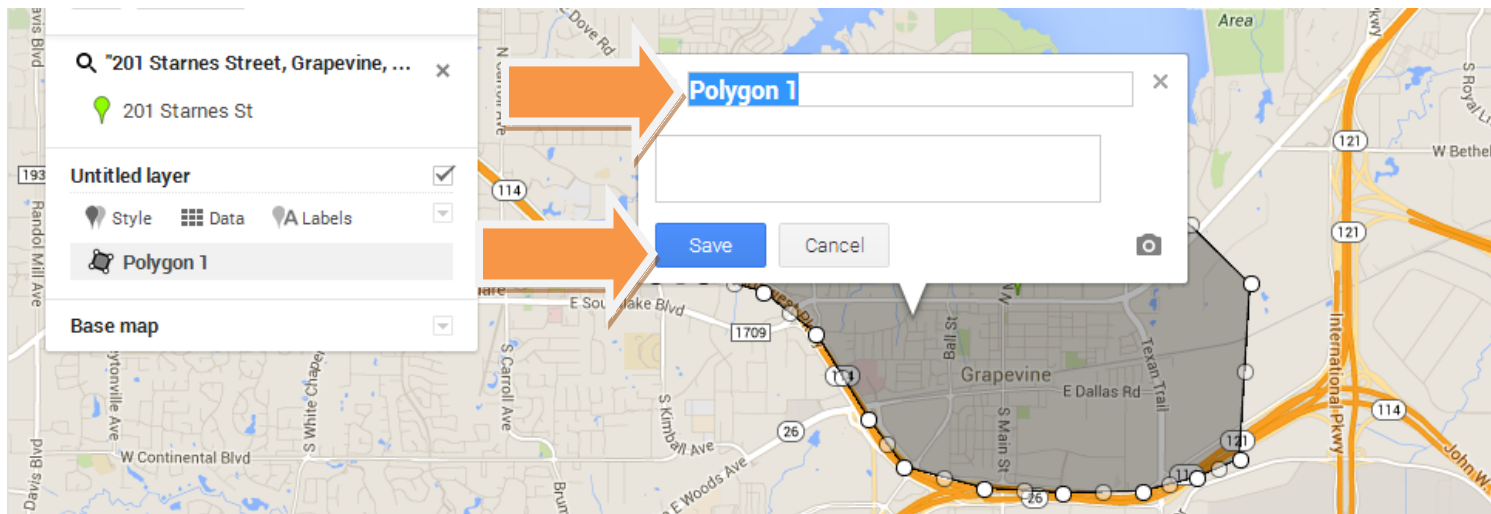

**NOTE: You may add additional Delivery Areas to your map. You will follow the same import steps no matter how many delivery areas have been created. DO NOT overlap Delivery Areas!

To add a Second Delivery area click on the Draw a Line icon & select add a line or shape. Create another delivery area using the draw a line tool. Find a good place to start and click the map to create a point. Create a shape that

around your delivery area. If you put the line in the wrong place doesn't start over; you can change the lines when you have completed the shape. Click the pencil icon to rename your polygon and follow the below steps to complete the import to Letsget.net.
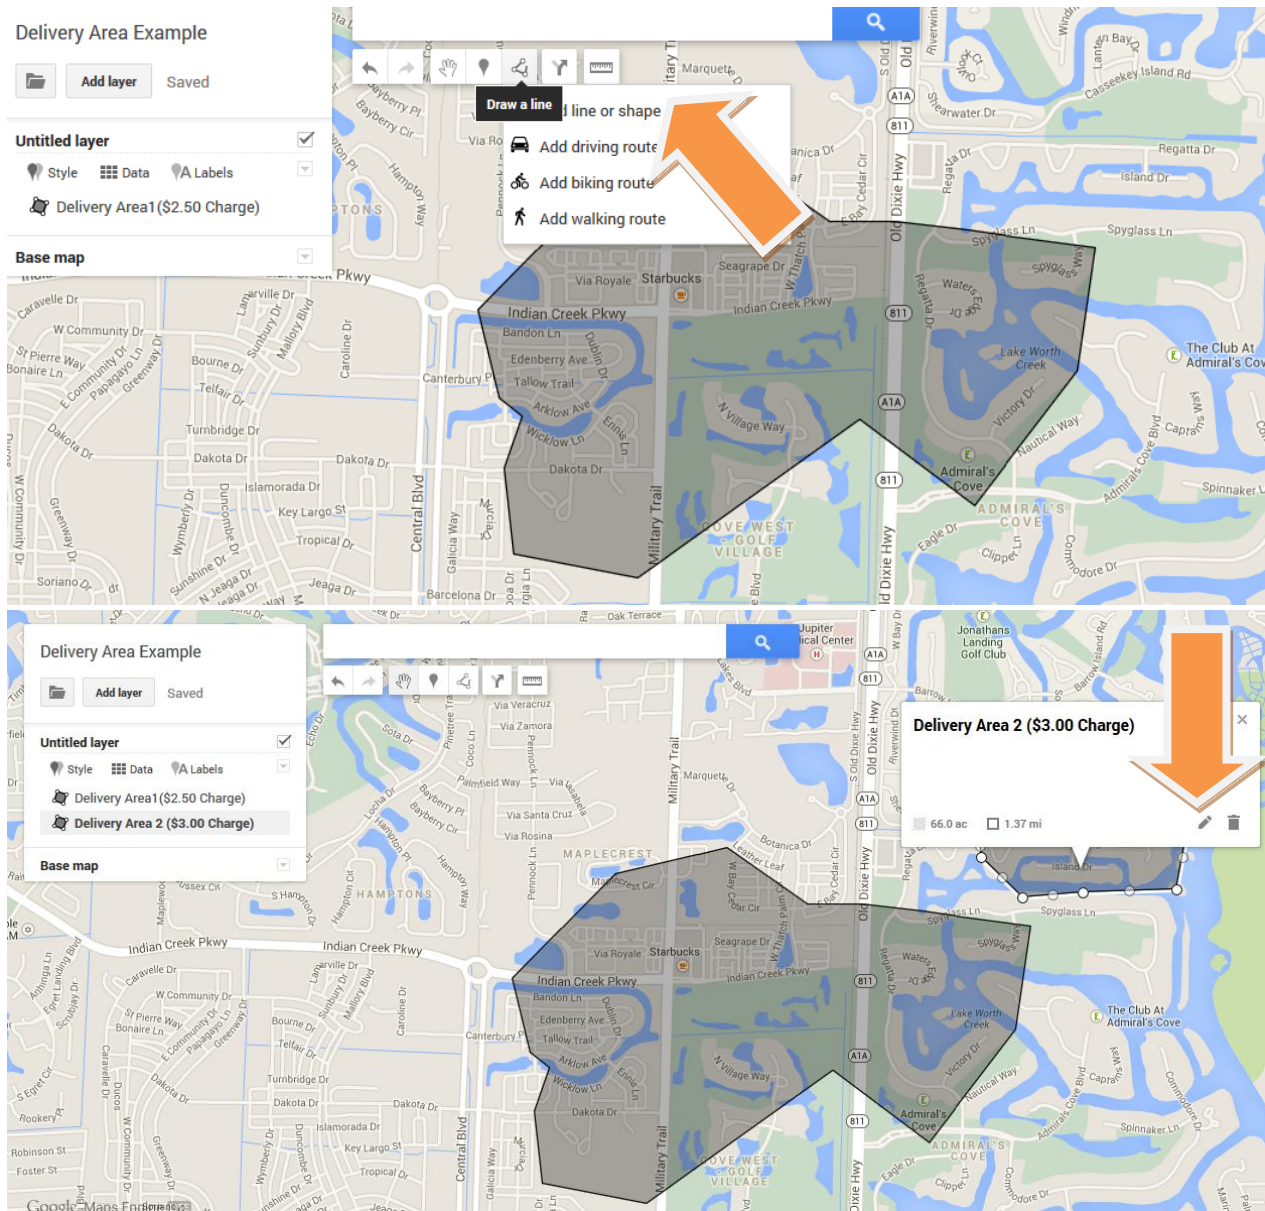

9.   Once you are satisfied with your delivery area you will then find the button near the top left of the page. It is a folder that looks like it is open.
10. Click the open folder & Click the button and Export to KML
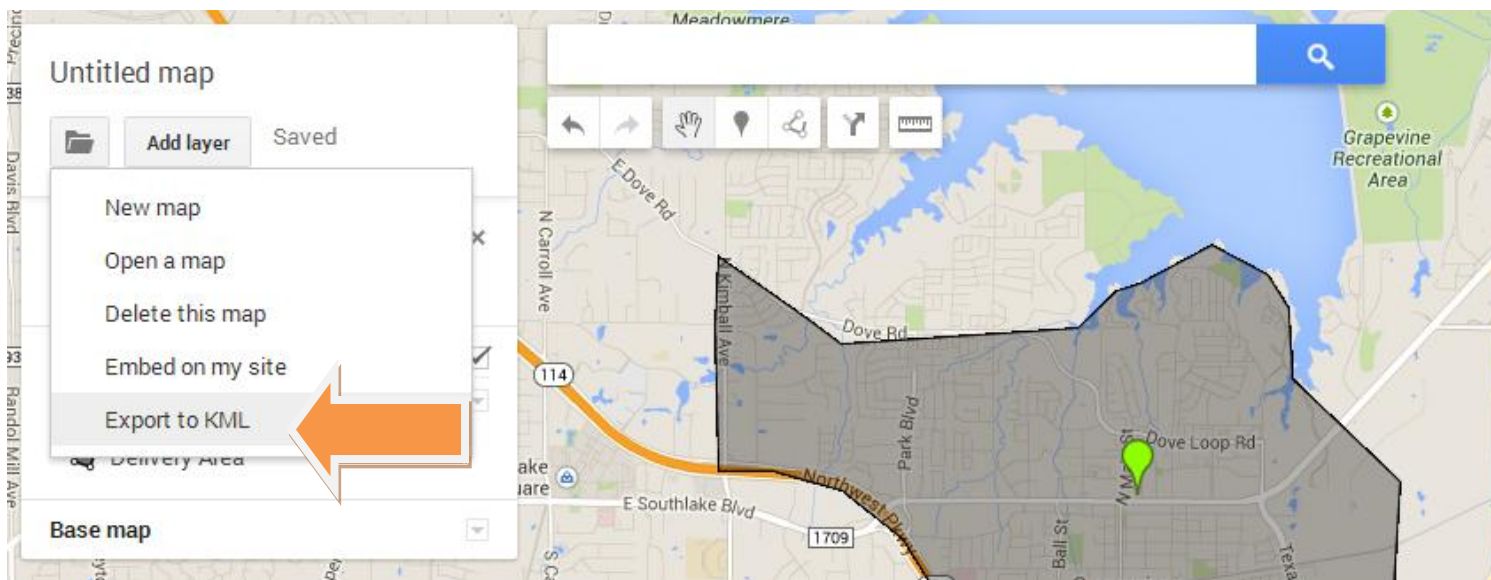

11. Export the Entire map and press download.
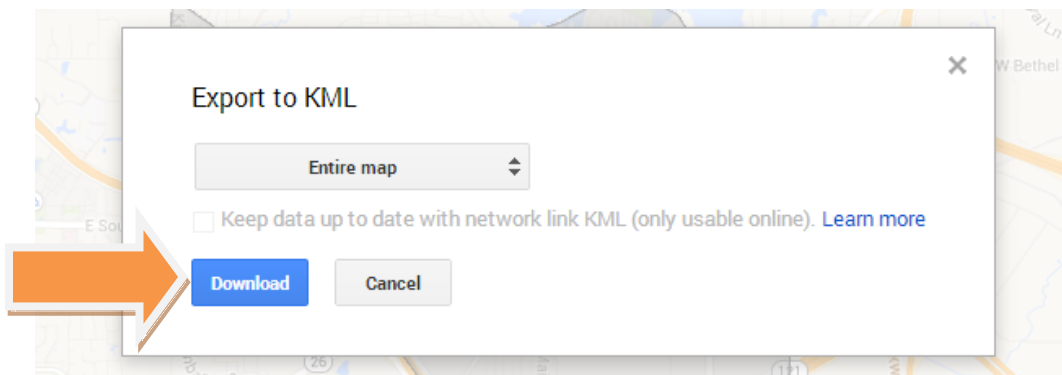

Log into Letsget Web Portal

https://admin.letsget.net/Private/Welcome.aspx

If you need your login information again, please call 800-750-3947 or log a support ticket at http://www.granburyrs.com/support/login.php

12. Please find that file in your computer downloads and upload the file directly to Letsget.net. To do this you will need to Login to Letsget.net and click on the Delivery Area tab on the left side of the page.
