FAQ

First Click Here

You are on Step 1) Select standard image repositories (below),

Step 2) To upload your own menu images, [Click here](#)

Click here to add your own pictures

Step 3) To upload your non menu images, [Click here](#)

Select the shared image directories that you wish to use to help build your menus. You may use these images along with your own images that you upload.

You will then assign these images to menu items using the Images link for the menu.

FAQ

Step 1) Select standard image repositories, [Click here](#)

You are on Step 2) Upload your own menu images

Step 3) To upload your non menu images, [Click here](#)

If you load a zip file, the images will be unzipped.

To make menu setup easier, you may wish to create your zip file using a directory structure where the first level directory name is Menu Items or Modifiers or Both and the second level represents an image grouping (Pizza, Drinks, Toppings etc.).

Any images with height or width exceeding 220 pixels will be automatically resized to not exceed this maximum.

Repository Aladinos Pizza

File No file chosen

Group Type Sort

[Add Group](#)

Choose your file, the press Upload File. Then Save.

Annotations:

- First, select a menu section to work with
- To pick an image, select the appropriate image group, then select an image from that group.
- Next, choose to edit what image will apply to this menu section when selected, unselected, or default

Step 4: Menu Section

- Select the menu section from the drop down on the left.
- Select images by choosing a “Group” of images from the drop down on the right.
- Click on “Selected Menu Section”, then pick an image that will appear when a user clicks on this menu section.
- Repeat for Unselected and Default image.

Suggestions

Style CSS

Selected Menu Section

1. Selected Menu Section

border-style:solid;border-width:4px;border-radius:8px;color:blue;background-

Unselected Menu Section

Menu Section Default Styles

[Copy!](#)

	Suggestions	Style CSS	Menu Item Columns
Appetizers	<input type="text"/>		1
Soft Drinks	<input type="text"/>		1
Chicken Wings	<input type="text"/>		1
Salad	<input type="text"/>		1
Create Your Own Pizza	<input type="text"/>		1

Advanced Styles

- From the Menu / Images area, click on Step 3: Set up Menu Styles
- Here you can control more advanced appearances using CSS.
- Also, use this area to adjust the # of columns of images to display for any menu category. 2 – 3 columns usually is best.
