How To Add “Included” Or Standard Items

Some Items, like Specialty Pizzas, include certain toppings. When online, typically restaurants want the customer to have the ability to remove some of those included items if they wish.

There are two methods for doing this. Both begin with these steps:

Log into Letsget Web Portal

1. From the side navigation menu select **Menus**. Then click **Menu Builder**.

The screenshot shows the LetsGet.net website interface. On the left is a navigation menu with the following items: Accounts, Home, Franchises, Activation, Account, Locations & Menus, **Menus**, Users & Passwords, Price Sheets, and Preview Menu. The 'Menus' item is highlighted with a green arrow pointing to it. The main content area shows the breadcrumb path: Nathan's Cafe (#4388) > Nathans Cafe (#3499). Below this is a table with two columns: 'Master Name' and 'In Use'. The 'Main Menu' row has a checked checkbox in the 'Master Name' column and a checked checkbox in the 'In Use' column. To the right of the 'Main Menu' row are links for 'Edit', 'Menu Builder', 'Coupons', and 'Images'. A green arrow points down to the 'Menu Builder' link. Below the links are two buttons: 'Preview' and 'Return'.

2. Click on the Menu Section that has the item you want to have “includes” (the menu item names are in red underlined text).

The screenshot shows the LetsGet.net website interface for editing a menu. The breadcrumb path is: Nathan's Cafe (#4388) > Nathans Cafe (#3499) > Main Menu (#2587). At the top are two buttons: 'Refresh' and 'Preview Menu'. Below these is the 'Menu Sections' section, which contains a list of menu sections: Beverages, Appetizers, Subs, Salads, Dinners, Pizzas, Desserts, and Chip. A green arrow points down to the 'Dinners' section. Below the 'Dinners' section are links for 'Add', 'Edit', 'Delete', 'Up', 'Down', and 'Quick Menu Section Add'. To the right of these links is a text input field. Below the input field is the text 'Separate by :'. At the bottom of the page is the 'Menu Items' section.

3. Locate the item you wish to build an includes list for and click on [Options](#)
