

PORTFOLIO PROFILE AND STRATEGY:

The Sir Edmund Hillary strategy follows a quantitative style investing in the top 140 most liquid shares of the JSE. The strategy consist of a combination of our momentum investment approach and value shares (based on growth, earnings and dividends) which have shown resistance to downside volatility and therefore provide stability to the portfolio. During normal market conditions the portfolio will have a long exposure of 220% and a short exposure of 40% which will be adjusted for adverse market conditions.

WHO SHOULD INVEST?

This strategy is suitable to Investors seeking maximum equity returns whilst taking substantially more risk than the market and have an investment horizon of at least five years. Allocation to this strategy should be limited to a maximum of 10% to 15% of total investment assets.

MANAGEMENT TEAM

TOM DE LANGE - CFA Charter holder B. Eng (Hons)

Tom de Lange, CIO of Emperor Asset Management, holds a degree in Metallurgical Engineering. Tom has been an active investor on the JSE since 1981. Over the past 25 years he has averaged a compound annual return of 26%, while over the last 15 years his return stands at 31%. He has extensive experience in various instruments, including shares, warrants, futures, spread trading and CFDs. Over the years Tom has developed several quantitative models and indicators that form the core of his investment strategies. These, combined with his vast computer programming experience and risk simulation knowledge have enabled him to design a truly unique investment system.

TC VAN DER WALT - BSC: Actuarial and Financial Mathematics (UP)

TC completed his BSc. Actuarial Science degree from the University of Pretoria. He started his career as a currency and commodities trader and later joined Emperor Asset Management in July 2010 as a Fund/Portfolio Manager. TC administrates and co-manages all of Emperor Asset Management's segregated portfolios and the Emperor Asset Management Momentum Long/Short Hedge Fund Strategy with Tom de Lange.

DISCLAIMER

This information is factually correct as at February 2015. Past performance is not indicative of future performance.

- * Calculated on net asset value. If the manager's performance is not in line with the FTSE/JSE Top 40 benchmark then no performance fees are payable. Fees are shown excluding VAT.
- ** Standard Deviation: Measures the volatility of investment return. The higher the standard deviation, the more volatile the investment strategy returns.
- *** Downside Standard Deviation: Measures the volatility of downside (negative) investment returns. The higher the downside standard deviation, the more susceptible the investment strategy will be to negative returns.
