

## RiverMeadow SaaS for Service Providers Enables Fast, Secure, Automated Cloud Onboarding

RiverMeadow SaaS enables onboarding into your Cloud from any Source (physical, virtual or cloud), quickly and securely.

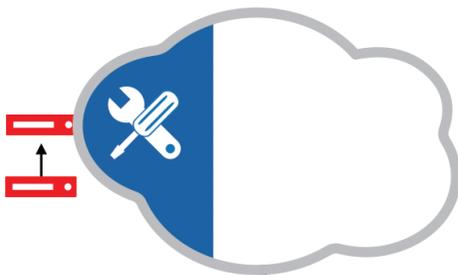

RiverMeadow's innovative Secure Direct Migration (SDM) feature is an automated, agnostic migration tool that leverages APIs to connect any Source environment (physical, virtual or cloud) to any Target Cloud (public, private and hybrid) without disrupting the Source in the process.

RiverMeadow simplifies the complex process of migrating customers workloads into your Cloud. White label and imbed RiverMeadow as an onboarding service to your Cloud today. It's easy and seamless.

### RiverMeadow SaaS Benefits:

- **Fast:** Automated migrations reduces hours required for set-up, configuration and execution. Also, multiple Sources can be migrated (batched) concurrently.
- **Secure:** Source data stays 100% behind the firewall. Critical for high compliance and high security migrations.
- **Automated:** API calls automate target VM set-up and design, source data collection and VM deployment to the Target Cloud.

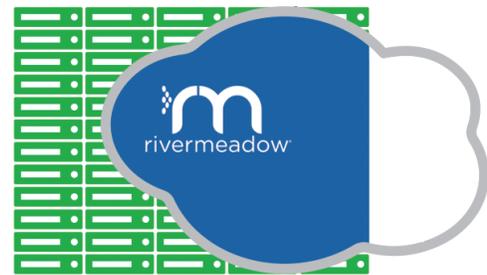

# FILL Cloud CAPACITY **10x** FASTER

### Manual Migrations, offline

Manual migrations can take more than 20 hrs per server and must be done one at a time.

VS.

### Automated Migrations, online

Migrate an unlimited number of servers at once, speeding up capacity utilization and increasing revenue.

## RiverMeadow SaaS for Service Providers

### With RiverMeadow SaaS You Can:

- Handle complex onboarding requirements, deliver services faster, and enable stronger RFP responses
- Lower your cost structure and be more competitive on RFPs
- Meet high security and compliance requirements
- Pay only for the level of RiverMeadow SaaS required
- Embed RiverMeadow SaaS into your solution
- Lower risks, test and verify migrations before migrating

### When to Work with RiverMeadow

Is RiverMeadow the right partner for your company?

- ✓ Are your solutions being used for Source environments that are large, varied and complex?
- ✓ Does your solution need to support a mix of public and private Clouds as well as hybrids?
- ✓ Are you interested in reducing manual work and on projects and increasing margins?
- ✓ Are you being asked to support global onboarding capabilities?
- ✓ Do you want to add more value added services and tools to your solution set?
- ✓ Are your customers concerned about security and compliance?
- ✓ Is it critical that business operations are maintained while completing migrations?
- ✓ Do you need back-up, test and restore environments?

If you answered YES to any or all of these questions, RiverMeadow SaaS can help you with your Cloud onboarding needs and quickly implement RiverMeadow SaaS. We can work with your team to automate Cloud onboarding for your customers.
