

RiverMeadow SaaS Enables Fast, Secure, Automated Cloud Onboarding for Enterprises.

You need server data, packaged apps and workloads moved into the Cloud efficiently and effectively. Your source environments are complex and varied. Cloud sprawl from shadow IT practices may have taken over your business. Security and compliance are critical to your organization. You need a solution that supports your current cloud migration needs, while giving you flexibility to make changes in the future.

RiverMeadow SaaS is the answer.

RiverMeadow SaaS with Secure Direct Migration (SDM) is an automated, agnostic migration tool that can connect any Source (physical, virtual or cloud) to any Target Cloud environment (public, private and hybrid) quickly and securely, without disrupting the Source in the process. Gaining access to RiverMeadow SaaS could be vital to your business.

RiverMeadow SaaS Benefits:

- **Fast:** Automated migrations reduces hours required for set-up, configuring and executing migrations. Also, multiple Sources can be migrated concurrently.
- **Secure:** Source data stays 100% behind the firewall. Critical for high compliance and high security migrations.
- **Automated:** API calls automate target VM set-up and design, source data collection and VM deployment to the Target Cloud.

Manual Migration, offline

Automated Migration, online

RiverMeadow SaaS for Enterprise

With RiverMeadow SaaS You Can:

- Automate migrations and lower man-hours required
- Lower your TCO for onboarding activity
- Lower risks, test and verify configurations prior to migrating
- Pay only for the level of RiverMeadow SaaS required
- Avoid vendor lock-in, maintain flexibility to make changes as needed

When to Work with RiverMeadow

How do you know if RiverMeadow is right for your company?

- ✓ Do you want to maintain control over migrations and perform all tasks related to moving workloads?
- ✓ **Are you concerned about security and compliance?**
- ✓ Do you need workload portability sandboxes for testing?
- ✓ **Are your Source environments large, varied and complex?**
- ✓ Will you need a mix of public and private Clouds, and even some hybrids?
- ✓ **Do you need to maintain business operations while completing migrations?**
- ✓ Are you looking for global support and onboarding capabilities?
- ✓ **Do you need back-up and restore environments?**

If you answered YES to any or all of these questions, RiverMeadow SaaS can help you with your Cloud onboarding needs and quickly implement RiverMeadow SaaS. We can work with your Cloud Service provider to get your onboarding process started.
