Senior Automation Engineer – Operations
Job Description

RiverMeadow is looking for enthusiastic and motivated people who want to be right in the middle of not just cloud computing, but multi-cloud agility. With a friendly, fast-paced culture, RiverMeadow provides an ideal environment for talented people solving complex problems with a first of its kind brokerage platform.

The Senior Automation Engineer will be responsible for the automation of the operational tasks to run our RiverMeadow Cloud Migration SaaS Management platform. The position requires working closely with a small, committed team of operations engineers. The Senior Automation Engineer will also be working very closely with Development in building out an automated platform around continuous integration and no downtime. There are many challenges to solve with very interesting technology.

Major Responsibilities
- Automating the administration of Linux servers by: bare-metal provisioning, installation, software packaging, service configuration and integration with our monitoring platform.
- Development of tools to instrument internal support and operational processes.
- Work closely with Engineering and Operations to develop an end to end automated platform.

Qualifications
- 2+ years Configuration Management Experience (Puppet, Chef, CFEngine, Salt)
- 5+ years release engineering, automation, or development experience.
- 5+ years Linux experience.
- Fluent with Git
- Polyglot scripting experience (Must be fluent in at least two of the following: bash, python, perl, ruby)
- Detail oriented self-starter capable of working independently.
- Experience working in a high throughput SaaS environment.
- Experience with private or public cloud technology.
- Experience in Agile development environments.

Desired skills (not mandatory)
- Excellent written and verbal communication skills with ability to document and design proposals.
- 5+ years programming experience with scripting languages.
- 3+ years of Git and integration with Git development to operational workflow.
- Expert in writing software packaging, and deploying into a fully automated environment.
- Expert in Chef
- Familiar with big data technology
- Previous experience in Database Systems (MySQL, Postgres)

Pay is commensurate with experience, and highly competitive.
