

ENGINEERED EXPERTISE | INNOVATIVE PRODUCTS & PROCESS SOLUTIONS | RESPONSIVE SERVICE

# ENGINEERED AIR POLLUTION SOLUTIONS

**Catalytic Products**  
INTERNATIONAL

Catalytic Products International is a trusted resource providing engineered solutions meeting the most challenging regulatory air pollution control problems. We deliver a complete range of products and services developed through years of application engineering experience in a variety of industries

Today we are helping companies grow by bringing Engineered Air Pollution Control Solutions to project planning and execution. We provide sustainable solutions that lower cost of ownership, deliver highest uptime reliability, exceed environmental regulations, and blend seamlessly into unique manufacturing processes.

## EXPERTISE

We focus on understanding your needs inside and out, so we can custom engineer your solutions that fit best

### Application Expertise

Process engineering  
In-house engineering  
Chemical, mechanical, electrical  
HA & HAZOP

### Project Management

Dedicated project team  
Critical path scheduling  
FAT and OAT options  
Integrated service team

### Quality Program

Design review procedures  
Quality control documentation

### Engineering Capabilities

Design consideration analysis  
Budget development  
Environmental compliance analysis  
Concise bid documents  
Specifications and drawings  
Process integration and monitoring  
Installation options and scope planning  
Project planning and management

**We are driven to help you succeed**

## INNOVATION

With a custom engineered approach that began IN 1969, supported with our regulatory knowledge and operating principles, we develop practical solutions for your process.

Thermal Combuster Systems  
Catalytic Oxidizers  
Heat Exchangers  
thermal oxidizers  
Catalyst  
Abatement Systems  
Regenerative Thermal Oxidizer  
Heat Recovery Systems  
Incinerators  
Engineered Air Pollution Solutions  
concentrators

# RESPONSIVENESS

## Dedicated TEAM - There When You Need Us

### 24-Hour Emergency Service - FAST RESPONSE TIME

- All systems backed by 24 hour service line.
- Troubleshooting telephone support.
- Remote monitoring equipment available.

### Emergency Part Inventory & Spare Parts Sourcing

- We source all parts; custom devices, & stock parts.
- Custom inventory programs to minimize your ownership cost.

### Preventative Maintenance Plans

- Customized plans available, based on needs.

### Installation Services, Start-up and Relocation Assistance

- Minimize downtime and meet compliance regulations.
- Ensure precision alignment for safe & efficient operation.

### Training

- OSHA Certified technicians to train and support your personnel.

### Permit Assistance Available

- Industry expert assistance and compliance support.

### Servicing all manufacturers makes and models

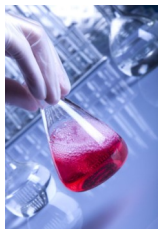

### Engineering Packages

- We offer a variety of engineering packages. From feasibility studies, energy conservation, and process integration to retrofit.

### After-Market Service

- Equipment Review and Evaluations
- Rebuild and Retrofits
- Media and Valve Replacement
- Catalyst Service and Testing
- Emission Audits
- OEM & Custom Parts
- Control Updates

## MARKETS

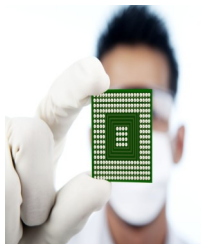

### CHEMICAL

Today the world's leading companies rely on us to ensure improved performance of their environmental stewardship programs and processes. We have installed air pollution control systems in a number of diversified end-use markets.

### ENERGY

With over 600 installations worldwide, we have helped our customers reach higher levels of performance and profitability.

### ELECTRONICS

Today we are helping companies grow by bringing Engineered Air Pollution Control Solutions to project planning and execution. We provide sustainable solutions that lower cost of ownership, deliver highest uptime reliability, exceed environmental regulations, and blend seamlessly into unique manufacturing processes.

### FOOD & PHARMA

### RENEWABLES

### COATING & PRINTING

### AUTOMOTIVE
