

*Coding is our business.  
We are not a  
staffing company.*

***HCCS is ready to work for you***

HCCS is a full-service medical coding and consulting company founded upon uncompromising values and dedicated to the clients we serve and to each other. Our services assist our clients in processing their medical record charts, from patient discharge through the billing cycle, accurately and promptly. Aside from offering coding related consulting services, we do not deviate from our one simple mission: provide the best coding around.

Our company is based in Fort Myers, Florida but we are truly a remote coding company with most of our employees and clients spread across the nation. This gives us access to a deep talent pool when hiring and allows us to assist facilities regardless of geographic location. We at HCCS are driven to be much more than the typical coding company, and we are confident you will agree that we have achieved this goal.

*HIM Coding and  
Auditing Services*

# Coding Services

First and foremost, HCCS is a remote coding company that deals with all chart types from clients spanning the spectrum of health care providers. Our comprehensive coding services include everything from back-up coding and backlog elimination, to full outsourcing.

- Greater than 97% overall coding accuracy with more than 98% reimbursement coding accuracy
- Less than 24 hour average turnaround time
- Monthly Internal Audits on 3-6% of all HCCS coding with reports provided
- Every HCCS coder is required to have an RHIA, RHIT, CCS, CPC-H or CPC.
- 100% of our coders are U.S. based
- Concurrent analysis of and reporting on facility's DNFB

## How We Code

Our coding is provided remotely and we are completely flexible in regard to how we access charts. We can remotely access electronic medical records through a VPN or CITRIX environment and we utilize our Chart Management system, ChartStream, to scan paper charts. Once we have access to charts, our scheduling department distributes them to the team of coders that is assigned to each account. Because our coders each specialize in one chart type (e.g., IP, OP, ED), even our smallest clients have multiple coders assigned to them and therefore enjoy the benefits of a fully specialized coding team. We can complete a start-up and begin coding for a hospital within a matter of days, or even hours from the word go.

## Consulting Services

Our expertise across the Health Information Management continuum affords us the ability and resources to provide comprehensive consulting services to facilities around the country. Our consulting services are designed to assist our clients with critical areas of coding and billing.

- Coding and Documentation Audits
- Clinical Documentation Improvement (CDI)
- Ongoing external audit defense and denial management
