The acquisition report allows you to begin the tracking of all your liquor & wine bottles, from the moment they are purchased till the day are sent to the recycling bin. When the bottles are delivered to your establishment, they are tagged with the Scannabar label. The user then simply scans the manufacturer's UPC code and then the Scannabar label.

The acquisition report allows you to verify if the bottles ordered from your supplier have been actually entered into inventory thus creating a check and balance between receiving and purchases.
