The Scannabar system allows you to set par stocks either by full bottles or by volume which is very useful for slower moving products. By setting a minimum and maximum level for all your varieties, our system will prompt you to re-order the necessary product along with the quantity on hand, the suggested re order quantity and the last unit cost. The re-order report is automatically generated with all the necessary information, ready to be sent to your local supplier. This report is also available per individual distributor.
