

PRODUCT INFORMATION

Concerto system

CONCERTO: complete control and absolute flexibility

Numerous compressor stops and starts, energy wastage and wide variations in the compressor operation represent common problems in many compressed air systems.

Concerto is Mattei's state-of-the-art compressed air management system, designed to satisfy any requirement of a compressed air user, regardless of the type of compressor installed. By the use of customizable functions the device allows the simultaneous command and control of **up to 16 compressors**, limiting the idle running times and optimizing the customer's choice. Concerto enables **energy savings of over 35%**.

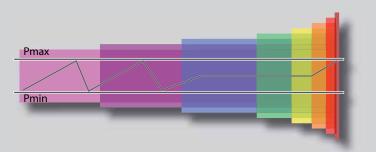

9 system in perfect harmony

Concerto can control compressors with different performances and functions, including in already installed systems, by automatically adjusting compressed air production according to the unit's air requirements.

The system automatically calculates the network's size, displaying the unit's key energy efficiency parameters and constantly monitoring management costs, also online.

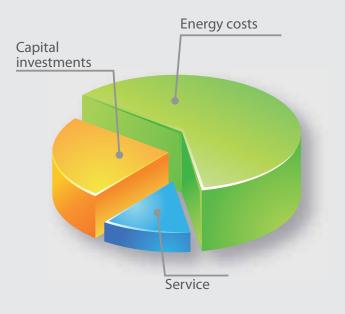

Constant cost monitoring

Today's industries and craft enterprises are aware of the importance of a system that controls and manages compressed air production systems.

The energy costs incurred during a compressor's entire life cycle are higher than those involved in the purchase and maintenance of the equipment.

Compressed air production systems evolve over time, and different (sometimes very different) compressors are frequently found in the same unit.

Concerto is expressly designed to control and monitor compressor rooms, achieving the perfect harmonization of all types of units. Concerto **optimizes the costs and ensures safe and cost-effective compressor operation.**

IMMEDIATE SAVING

Regardless of the compressors combination and model, Concerto always selects the most economical configuration, maximizing the plant efficiency.

Concerto controller extends the life of your compressors, guaranteeing the **smallest number of motor start ups, and eliminating idle running times almost completely.**

AN INTELLIGENT SYSTEM

Concerto requires few programming parameters enabling the combination of compressors with different performances by aligning production and consumption values.

A large display facilitates system programming, making it simple and intuitive.

qII-in-one management

Dryers, filters and condensate treatment accessories can be directly connected to the system via digital inputs. In the same way analogue output sensors can be connected, in order to monitor the entire compressed air system.

Due to this Concerto provides an extremely wide range of information regarding the plant management, which is also viewable via web server.

Concerto system

efficient and modular

CONCERTO

Concerto provides configuration flexibility, allowing numerous operating combinations. The control modules enable the control of up to 16 compressors of different types and by different manufacturers.

Concerto also manages and monitors variable speed inverter compressors, ensuring operation within the maximum efficiency range.

With this dynamic management system, it is the unit's productivity that determines the best compressor combination to be started.

- Over 35% total savings
- Reduces energy costs related to idle operation by 99%
- Cuts maintenance costs by 30%
- Extends the compressor's life cycle by 50%
- Requires an investment of only 5%
- **7** Constantly monitors unit operation

* The data may vary according to the unit's distinctive features.

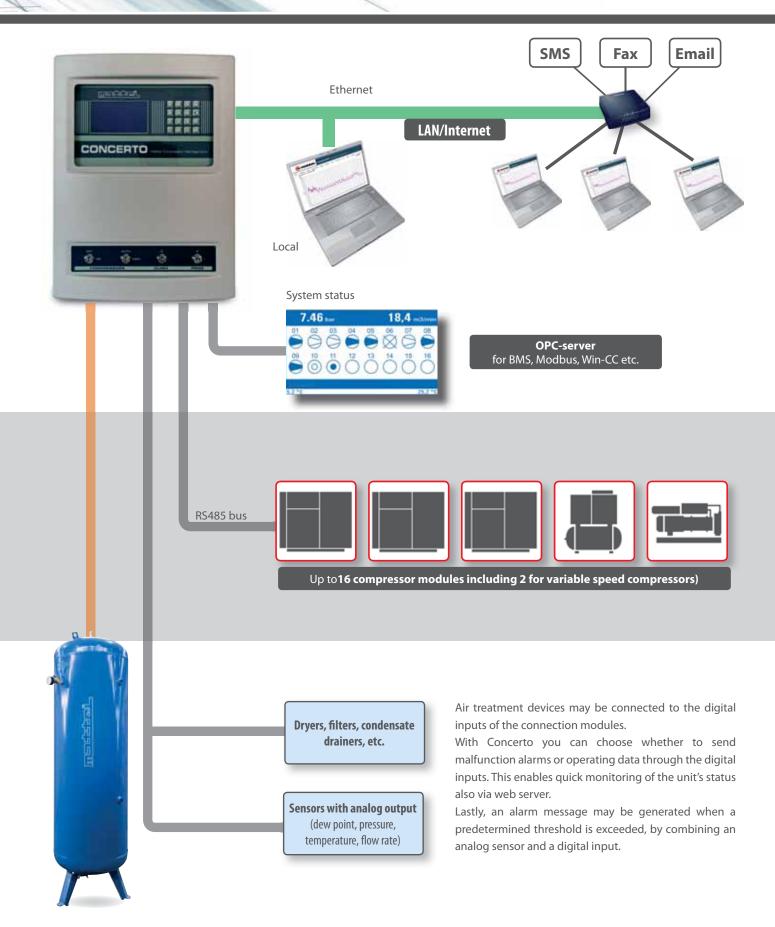

Integrate communication

The main parameters, failure signals, maintenance intervals and energy consumptions can be directly displayed on a PC via a normal web server. This way the equipment can always be easily monitored and controlled in order to minimise unplanned events.

All the collected data are saved in a long-life storage device and process in high-resolution diagrams for optimal unit monitoring.

Concerto system

*Q***Iways caring about our customers' requirements**

WORLDWIDE CONSULTANCY AND ASSISTANCE

Mattei operates worldwide with its sales and assistance network, providing a wide service range.

By purchasing a Mattei compressor you can rely on a qualified after-sales service, able to answer any request for assistance in very short time scales.

CertiFied quality

Quality as an integral part of all company functions and constant improvement of all production processes so as to always guarantee the maximum level of reliability and satisfaction. This, in brief, is the value and the

meaning of Mattei's operational philosophy. A way of approaching the market and customers that makes Mattei an absolute point of reference in the compressed air sector.

Since 1994, Mattei has been operating with a Quality System certified by the DNV Institute under UNI EN ISO 9001 regulations.

MIEM: Mattei Intelligent Energy Management

The cost to produce a fixed quantity of compressed air greatly depends on the efficiency of the compression system.

To obtain potentially significant energy savings it is important to identify the minimum working pressure and demand profile required for a plant's compressed air supply.

The MIEM system allows Mattei to check the suitability of a currently installed compressed air plant and to verify any possible opportunities to improve its efficiency.

Thanks to specifically developed software, Mattei's technicians are able to evaluate the customer's current air consumption profile and to estimate the relative energy consumption. In addition the MIEM analysis allows Mattei to simulate the optimum energy solution via a computer, often providing potential savings of 40%.

Total quality management

Mattei considers quality as an essential value that represents the key factor to develop a positive relationship between the culture and performance of one's company. Innovative management software, developed solely for Mattei and technologically advanced manufacturing equipment, such as robotic machining centres and high precision machine tools, are at the heart of the advanced technical and quality levels of Mattei's products.

Technical Features

Power supply connection	
System	1~/N/PE
Voltage	90-230 V 50/60 Hz
Display	
Туре	LCD-Display 240x128 Pixel
Interfaces	
Total compressor modules	16
Number of variable speed compressors that can be connected	2
Number of modules for sensors and accessories	8
Compressor connections	
Compressor connection	4 x RS485
Max serial line length	max. 1200 m
Client	1 x Ethernet
Storage card	
Туре	SD card (1 GByte)
Temperature	
Operation and storage	0 - 45 °C
Casing	
Size	380 x 480 x 130 mm
Design	Plastic box for wall mounting
Protection index	IP 54
Weight	~4 kg
EMC conformity	
EN 61000-4-2 EN 61000-4-5	
EN 61000-4-3 EN 61000-4-6	
Concerto standard supply	
Pressure probe	
Integrated SD storage card	
Documentation	
Web-server system
