GSX Solutions Shows Up in the Cloud at Microsoft TechEd 2012

Latest GSX Monitor & Analyzer runs multiple scenarios in private clouds

Orlando, FL (TechEd 2012) – June 11, 2012 — GSX Solutions [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including Microsoft Exchange, Microsoft SharePoint, BlackBerry Enterprise Server (BES) and Lotus applications , today announced that its latest enterprise cloud collaboration solutions are showcased at the Microsoft TechEd 2012 show. GSX Monitor & Analyzer now enables IT managers to run system, application, and end-user scenarios that continuously track messaging and collaboration performance in private cloud environments.

"Security, cost, and efficiency concerns have driven IT operations toward infrastructure standardization and optimization, first through virtualization and now via cloud computing," said Antoine Leboyer, CEO of GSX. "The dramatic growth in corporate collaboration is an excellent case in point. GSX Monitor & Analyzer tools are designed to help efficiently manage this new environment, and provide our customers with a whole new level of service in the cloud."

"Monitoring applications which run on virtualized, cloud, or other shared infrastructures requires that tools go deep into the application execution to calculate the service levels critical to application stakeholders," said Jonah Kowall, Research Director at Gartner. "Tools now have to determine the types of shared environments in which the applications are executing."

GSX demos (and E-Space Invaders!) at TechEd North America, June 11-14

Steve Bystran, SVP, Global Sales & Business Development and Jeff Piot, VP for Microsoft Global Markets, will demo at the GSX Solutions booth #1944 how the latest release of GSX Monitor & Analyzer can manage Exchange and SharePoint collaboration resources across multiple business units in private or hybrid clouds. They explain how agentless, out of the box automation without the need for configuration scripts can provide continuous availability and the perception of infinite capacity.

And look out for E-Space Invaders throughout the show! "Shoot" the critters in a photo of yourself, tweet about it using the hashtags **#GSXSPI and #Msteched,** and then come to the GSX booth to pick up a t-shirt, sunglasses, or another prize, and enter the drawings for the one-week Caribbean cruise and a GSX drone. Complete contest details can be found at www.gsx.com/teched-espace-invader.

GSX Solutions has been nominated as a finalist for the **Best of TechEd Award (BOTE).** More than 280 products were nominated with 46 finalists selected in 15 categories. GSX is competing in messaging and unified communication category and products will be evaluated based on each strategic importance, competitive advantage, and value to customers. Winners for each category will be announced Thursday, June 14, 2012. If you are attending the TechEd you can vote for us following this link http://northamerica.msteched.com/bote#fbid=5Xu-piDfZ-_
