GSX Launches New Outlook Anywhere and Unified Messaging Exchange 2010 monitoring and reporting capabilities

New GSX Monitor & Analyzer release keeps tabs on Outlook Anywhere and Unified Messaging

Orchard Park, NY – January 16, 2013 — [GSX Solutions](http://www.gsx.com) [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including [Microsoft Exchange](#), [Microsoft SharePoint](#), BlackBerry Enterprise Server ([BES](#)) and [IBM Notes](#), today announced new Outlook Anywhere and Unified Messaging Exchange 2010 monitoring and reporting capabilities for GSX Monitor & Analyzer. The latest enhancements help pinpoint delivery issues and assure continuous universal user access to the Microsoft Exchange protocols and infrastructure.

“Outlook Anywhere really means ‘anywhere’ so it’s vital to assure that users can access their messaging from any location, be it in the company, at the local Starbucks, or at home,” said Antoine Leboyer, CEO of GSX. “We also extended monitoring to the Unified Messaging role in Exchange 2010, to help assure users’ access to voice messages, faxes, and emails via their personal mailboxes.”

The latest GSX Monitor & Analyzer enhancements include:

- The monitoring of Outlook Anywhere connectivity.
- The reporting of Outlook Anywhere connectivity statistics.
- Monitoring the automatic configuration of Unified Messaging users.
- Continuous monitoring of the Unified Messaging environment including server availability, disk storage, CPU, RAM, and other health statistics.

By continually interacting with your system as a user with mail routing scenarios and other tests, GSX automatically identifies emerging issues and alerts you to take corrective action ahead of time.
