

GSX Monitor & Analyzer Streamline your business-critical messaging & collaboration environments

GSX Monitor & Analyzer

With SCOM

GSX Monitor & Analyzer is the most widely used monitoring and reporting solution for collaboration, messaging and mobile environments. It safeguards the operation of over 5 million email accounts worldwide.

Providing extensive capabilities to anticipate problems before they impact users, **GSX Monitor & Analyzer** works with SCOM to build a complete solution that monitors and reports on the High Availability of the key components in your collaborative and messaging environments.

BENEFITS

• Get a comprehensive view of the performance and availability of your environment

• Measure, collect, alert and report on the High Availability KPIs

• Anticipate potential issue before it impacts the line of business

Agentless, user friendly and with extensive reporting capabilities, **GSX Monitor & Analyzer** helps you leverage your SCOM investment. Without installing anything on your collaboration servers, GSX measures, collects, alerts and sends report on the key critical points of your Microsoft Exchange, SharePoint, BlackBerry and Lotus environments.

With the subject matter expertise inside GSX Monitor & Analyzer, you get a deeper view of what is happening and integrate the information to SCOM before the problem impacts the end user.

GSX Monitor & Analyzer is the "expert" administrators need to simply and efficiently get the most from SCOM, enabling proactivity, real High Availability monitoring and automatic reporting on your collaborative environment.

GSX leverages your SCOM investment

GSX Monitor & Analyzer works with SCOM to give Microsoft Exchange, SharePoint, BlackBerry administrators a way to be alerted that a problem will soon impact the end-users. As a single agentless management pack for the entire collaborative environment, **GSX Monitor & Analyzer** watches response time and latency. It allows SCOM administrators to get a comprehensive view of performance without any scripts to develop and maintain.

GSX Monitor & Analyzer helps you to act more proactively on potential problems, thereby reducing Mean Time to Repair (MTR) and ensuring higher satisfaction from the business unit.

An important SCOM complement

GSX Monitor & Analyzer is the only tool that focuses on High Availability and resilience of your collaborative environment. Looking at the Exchange DAG and CAS Array as a real entity, **GSX Monitor & Analyzer** measures, collects, alerts and reports on the High Availability KPIs to facilitate performance and capacity management.

Moreover, **GSX Monitor & Analyzer** allows real management of the mailbox databases for your Exchange environment, providing easy and automatic reports.

SharePoint is tested as a user with end to end scenarios, BlackBerry becomes easy to monitor and to manage for any administrator thanks to the knowledge we put in GSX Monitor & Analyzer.

Don't spend anymore time struggling with reporting

SCOM is one of the best tools to monitor your entire environment but when it comes to reporting, everybody knows that you need serious skills in SQL reporting to get useful reports from the huge amount of data available.

GSX Monitor & Analyzer focuses on the data administrators really need to manage their environment, providing out-ofthe-box performance and capacity reports. Number of mailboxes, size, the availability of the mailbox and mailbox databases across the DAG, true end user performance on SharePoint and BlackBerry through real time scenarios, High Availability and SLAs reporting are part of the unique GSX reporting solution **GSX Analyzer**.

Let the collaboration "expert" do the work for you

With more than 15 years in the monitoring and reporting space and more than 600 customers worldwide, GSX Solutions encompasses a lot of knowledge and experience in its products to deliver a simple and user friendly solution that helps both SCOM and the Administrator.

Let **GSX Monitor & Analyzer** works and alerts you when issues might occur and you stay two steps ahead.
