GSX Solutions to Boost Service Providers' Revenue Options at MSP World

Latest GSX Monitor & Analyzer watches up-times and high availability to guarantee the best end-user service

LAS VEGAS, Nev. [MSP World], Oct. 7, 2014 — GSX Solutions [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including Microsoft Exchange, Office 365, Microsoft Lync, Microsoft SharePoint, BlackBerry Enterprise Server (BES) and IBM Notes, will showcase how Managed Service Providers could **develop new remote management services around Office 365, Lync, Exchange, and SharePoint thanks to GSX Solutions.** Stop by booth #36 at MSP World Conference, Las Vegas, Nev., Oct. 15 through 17 to see how MSPs can increase their revenue related to unified communications infrastructure. While most service-provider tools only provide a bird's-eye-view of systems, indicating whether the servers are on or off, GSX Solutions actually measures service performance from a user's perspective to anticipate and avoid costly outages. Different GSX robot users can be deployed to test service performance from any locations anywhere in the world.

Main GSX Monitor & Analyzer benefits:

· Differentiate your offer from the competition with remote monitoring and troubleshooting on the health of Microsoft applications, ensuring end-user satisfaction from every customer's location

· Build recurring revenue on Office 365

· Support migration to Office 365

· Offer targeted Reporting: justify the level of services provided to your customers with automated and on-demand reports

"GSX Solutions provides MSPs the option to offer additional services to generate revenue, while delivering a better service to their clients," said Jean-Francois Piot, product manager of GSX Solutions. "The GSX robot users can be deployed in the most remote locations, assuring top-notch service worldwide."

On display at MSP World, October 15 through 17, booth #36
