

GSX Solutions and BlackBerry Sign Strategic Reseller Agreement

BOSTON – Nov. 2, 2014 – [GSX Solutions \[www.gsx.com\]](http://www.gsx.com), the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including [Microsoft Exchange](#), [Office 365](#), [Microsoft Lync](#), [Microsoft SharePoint](#), BlackBerry Enterprise Service ([BES](#)) and [IBM Notes](#), today announced a strategic reseller agreement with BlackBerry to offer GSX Monitor & Analyzer as an advanced monitoring option to current and future BES clients. The latest GSX Monitor & Analyzer release provides real-time monitoring to quickly identify communication issues between servers and devices across multiple platforms.

“BES is still a mission-critical component for collaboration in major enterprises. Real-time performance stress tests with the GSX robot user can prevent problems by calling out and monitoring the slightest changes that might cause trouble,” said Antoine Leboyer, CEO of GSX. “The GSX Monitor & Analyzer identifies communication issues between devices and servers before they even impact users.”

The GSX robot user’s enhanced real-time [monitoring of BlackBerry Enterprise Service](#) environments collects user-simulation metrics to proactively monitor the performance and availability of servers, services and clusters. It monitors critical users and sends alerts of any unusual activity, thereby helping to manage the health of the entire mobile infrastructure with extensive analysis and reporting, including utilization forecasts for capacity planning.
