GSX Solutions Supports High Availability for BES12

Latest GSX Monitor & Analyzer to assure critical BES mobile collaboration now available

Boston, MA – February 26, 2015 – [GSX Solutions](#) [www.gsx.com], the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including BlackBerry Enterprise Server ([BES](#)), Microsoft [Exchange](#), [Office 365](#), [Lync](#), [SharePoint](#) and IBM applications today announced the release of the latest GSX Monitor & Analyzer v10.11 with advanced support for BES12 High Availability Server Pooling. The new release provides proactive end-to-end management of BES as an integral part of the overall enterprise messaging and collaboration infrastructure.

"Mobility—combined with the phenomena of BYOD and cloud—is transforming business and our industry, allowing people to work remotely from whenever they want" said Antoine Leboyer, GSX Solutions CEO. "This new version combined with the strategic alliance with BlackBerry will build on our momentum in bringing high availability and performance of any BES 12 deployments to our clients globally, and leverages BlackBerry's leadership in managing mobility for the secured enterprise. We are delighted to be teaming with BlackBerry and continue our global approach and seamless integration of both our solutions."

"Mobile devices have evolved to become a primary conduit of enterprise data access. As a result, the performance of the mobile infrastructure is critical for both end-users and management. With this alliance, BlackBerry is able to deliver real-time monitoring of BES12, allowing our customers to be confident in their service uptime delivery," said Peter Ng, Senior Director of Global Alliances and Business Development at BlackBerry.

New GSX Monitor & Analyzer features for BES12 include:

- Support for high availability on BES12 monitoring
- Support for high availability including server pooling.
- Verification on the availability of Active Sync, SQL database and SRP connections
- Report, trend and forecast these components on a daily, weekly or monthly basis
