

Make Your Journey to the Cloud an Easy One with GSX's New Version

New GSX Monitor & Analyzer supports Office 365 in a hybrid cloud or fully in the cloud

BOSTON – June 10, 2014 — [GSX Solutions](http://www.gsx.com) [www.gsx.com]—the global leader in proactive, consolidated monitoring and reporting of enterprise collaboration environments, including [Microsoft Exchange](#), [Microsoft SharePoint](#), BlackBerry Enterprise Server ([BES](#)), and [IBM Notes](#)—today announced the release of GSX Monitor & Analyzer v10.8. The new release supports full cloud messaging-systems deployments as well as new platforms environments.

GSX Monitor & Analyzer v10.8 is especially well-suited for customers who are running the cloud-hosted version of Office 365, as it includes the following new features:

- A dedicated cloud overview for online exchange to detect any slow-downs and simplify troubleshooting.
- A user robot that processes end-user scenarios to anticipate any potential outages on Office 365.
- **Multi-station architecture** to compare trends, identify bottlenecks, manage alerts and analyze the level of services delivered to users across multiples sites and locations.
- New collaborative platforms supported with SharePoint 2013 and Sametime 9.
- Revamped global reports layout to uncover insights more quickly and easily.

“GSX Monitor & Analyzer continues to evolve in sync with our customers’ needs,” said Antoine Leboyer, CEO of GSX. “More and more organizations are migrating their messaging to the cloud, for both administrative efficiency and reduced costs. When they do, GSX will be at their side, both to smooth the transition and to keep an eye on operations when running in the cloud.”

GSX Monitor & Analyzer v10.8 now available

GSX Monitor & Analyzer 10.8 is now available to help organizations of all sizes make their move to the cloud smoothly controlling their migration. For more information on GSX
