# 24X7

24X7 provides you with the most flexible audio conferencing service, enabling you to conduct a conference any time you want without having to make a prior reservation.

When you establish your account, you will be given a passcode (access code) that is good for life. You and your colleagues can use this code over and over again. As the host, you will be the only participant with the moderator code, this serves as a security measure.

24X7 is ideal for the immediate sharing of your latest breakthrough idea or for gathering forces for immediate resolution to the crisis “du jour.” This service is also perfect for standing conferences where all participants can use and reuse the passcode. Last, 24X7 is excellent for work groups who routinely collaborate on projects.

Any WebPlus™ conferencing service can be integrated with 24X7 calls. The integration of audio and web conferencing tools into a single meeting allows for a most productive event – the power of the web combined with the passion of the voice.

Each WebPlus service includes a menu of presentation and/or collaborative tools that will enable you to best illustrate a new product concept or resolve an outstanding business issue. Whether you are giving a formal presentation to an audience of hundreds or brainstorming with a tight-knit group of colleagues, there is a web conferencing option right for you.

## features

- + Immediate access to the C3 Conferencing network to make a conference call anytime you want, virtually anywhere.
- + Conference passcodes that are “good for life” enable you and your colleagues to reuse the same passcode throughout your life as a C3 Conferencing customer.
- + InstantConnect™ provides you with the ability to call a meeting “on the fly” or to add members to the conference as needed.
- + Automatic enrollment to web conferencing services gives you the ability to enhance the power of your meeting whenever you wish.
- + The service is very secure. It is only the host (moderator) who is privy to the moderator code that is input to begin each 24X7 call.
- + PrivacyPIN™ is available for hosts with widely distributed passcodes to assure privacy on certain meetings.
