# Microsoft® Live Meeting Services & Web Conferencing

Live Meeting is a hosted web conferencing service that allows you to communicate and collaborate with anyone, anywhere with just a PC, an internet connection, and a telephone. Live Meeting offers the flexibility to choose the level of service matched to your needs. Choose from either the Standard Edition or Professional Edition.

With these economic times we are all trying to cut costs and still deliver much needed and valued services to our clients and communities. Live Meeting allows you to connect online so you can deliver a presentation, collaborate on whiteboards, pitch a new idea, conduct trainings, talk with constituents & funders and conduct board meetings.

## key features include:

### Standard

- + Application / desktop sharing
- + SSL encryption
- + Chat
- + Marker for annotation
- + Whiteboard
- + Text Slides
- + Seating Chart
- + Multiple hosts
- + Polling
- + Holds up to 1250 participants per meeting

### Professional

- + All of the above
- + Recording
- + Remote control

## 24X7

24X7 provides you with the most flexible audio conferencing service, enabling you to conduct a conference any time you want without having to make a prior reservation.

When you establish your account, you will be given a passcode (access code) that is good for life. You and your colleagues can use this code over and over again. As the host, you will be the only participant with the moderator code, this serves as a security measure.

24X7 is ideal for the immediate sharing of your latest breakthrough idea or for gathering forces for immediate resolution to the crisis "du jour." This service is also perfect for standing conferences where all participants can use and reuse the passcode. Last, 24X7 is excellent for work groups who routinely collaborate on projects.

## key features include:

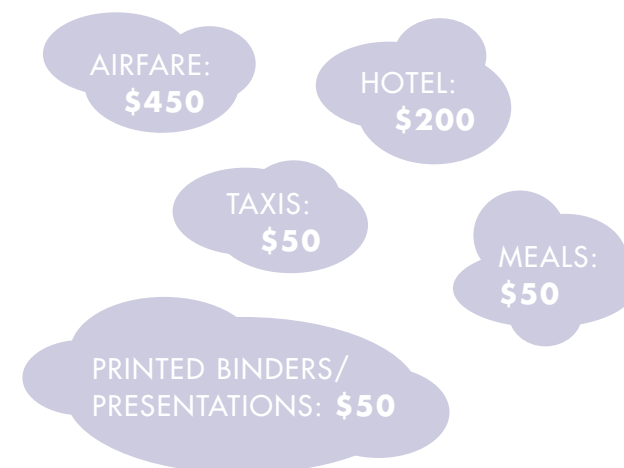

- + Immediate access to the C3 Conferencing network to make a conference call anytime you want, virtually anywhere.
- + Enable you and your colleagues to reuse the same passcode throughout your life as a C3 Conferencing customer.
- + InstantConnect™ provides you with the ability to call a meeting "on the fly" or to add members to the conference as needed.
- + Automatic enrollment to web conferencing services gives you the ability to enhance the power of your meeting whenever you wish.
- + The service is very secure. It is only the host (moderator) who is privy to the moderator code that is input to begin each 24X7 call.
- + PrivacyPIN™ is available for hosts with widely distributed passcodes to assure privacy on certain meetings.

## Why Conferencing Now?

In this economy we all are taking responsibility for cutting costs and maintaining increased productivity.

## How much does one overnight business trip cost?

Total estimated cost for one meeting:

**TOTAL ESTIMATED COST: \$800**  
(for one meeting - one trip!)

For only \$220 you can have yearly flat rate web conferencing via Microsoft Live Meeting.

How much can you save your organization by adding web conferencing services or increasing your use of audio & web services?

In addition to saving costs we are also now taking responsibility for treading on this earth lightly. Going Green, recycling, and keeping a low carbon footprint. Conferencing is a great way to do your part in this global effort.
