e-Service is a robust, yet simple and efficient solution that helps you manage technician scheduling, time tracking, inventory, sales, job costing, warranty & maintenance contracts, billing schedules, work orders and more.

e-Service allows services based organization to deliver with confidence and service for profit!

*"We are currently using the e-Service module to manage our installation staff who are going to cell towers all over the US. We create estimates, work orders and inventory transactions using this system and are impressed with the ability for our techs to input information on their Android devices while on site. The management of their time, expenses and activities through the portal allows our team to have real time information on what is happening in the field. Without this system we would still be sending spreadsheets all over! We are saving time and creating increased profitability with this module."*

*Vice President, Finance, MyCom*

## Work Order Management

*Drive higher profitability with efficient work order processing*

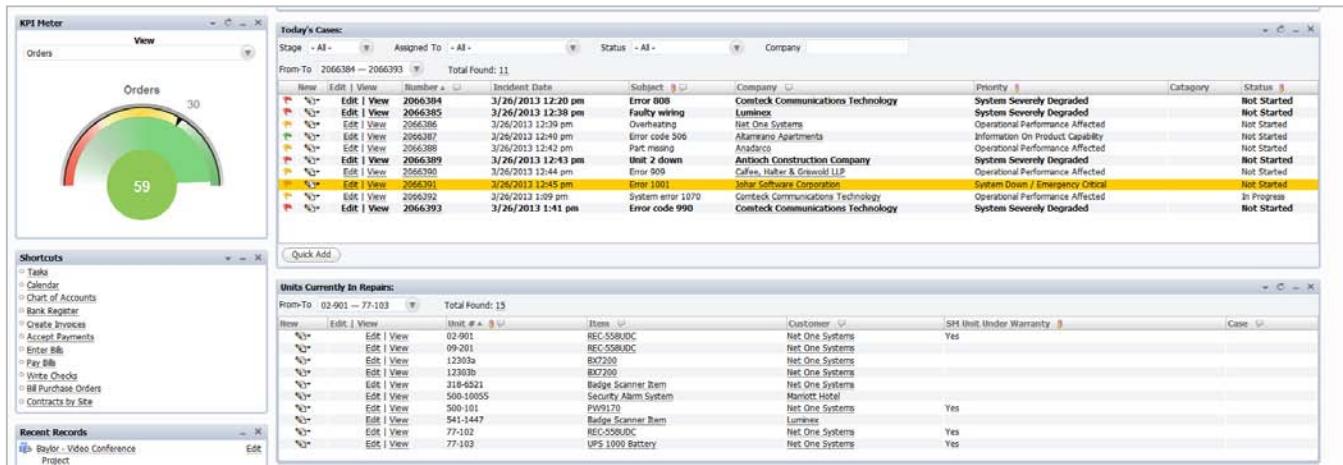

**Business Benefits**  
 Delivering the service is only step one. Ensuring that time, parts and service are quickly and accurately billed ensures cash flow and prevents profit leakage.

e-Service Work Order management provides you:

- ✓ A fully integrated service order-to-cash process within a single system
- ✓ Clear visibility into work order profitability
- ✓ Ability to process and bill service orders more efficiently to maximize cash flow

**Features**

- Monitor work order status and fulfillment in real-time
- Assign parts and inventory to work orders and jobs
- Calculate and monitor work order profitability
- Easily create, assign and update work orders
- Track time and expenses for work orders, jobs and customers
- Quickly and accurately invoice work orders
- Warranty Management (renewal & contract management sold separately)
- Validate work orders against contract entitlements and Service Level Agreements

## Service Scheduling & Tech Portal

*Schedule with confidence for service excellence*

**Business Benefits**  
 Effectively managing the complexities of availability, skill requirements, and customer demands is critical to service resource planning and assignment, no matter where you and your team are.

Service Scheduling & Tech Portal empowers you to:

- ✓ Centralize scheduling and dispatching
- ✓ Effectively identify and assign available resources
- ✓ Improve service levels
- ✓ Enhance customer satisfaction
- ✓ Utilize resources efficiently
- ✓ Mobilize your workforce, allowing for work order views and updates no matter where they are.

**Features**

- eService dashboard lets you see your entire day at a glance:
  - New orders that sales people have entered
  - Service events that need to be Scheduled, Confirmed, Completed
  - Monitor which techs are assigned to what jobs
- Manage technician skill sets then dispatch the best resource to work orders
- Easily locate customers by name, address, phone number, zip code, customer ID or equipment serial number
- Quickly print work orders and customer specific instructions
- Automatically notify clients of scheduled service calls
- Manage call escalations and workflows
- Field team can view and update work orders, time sheets, and schedules in the field.

## Job Costing

*Gain greater visibility and control of project and job related costs*

### Business Benefits

Specifically designed for tracking revenue and costs against a job, sales order, work order or contract. This powerful solution allows you to track revenue and allocate every expense incurred providing you with the real-time data necessary to make educated decisions required to drive profitability and customer satisfaction.

e-Job Costing allows you to:

- ✓ Reduce job cost administration
- ✓ Ensure job, work order, project or installation profitability
- ✓ Accurately recognize revenue and cost accruals

### Features

- Track profitability on:
  - Sales Orders
  - Work Orders
  - Jobs/Projects
  - Contracts
- Categorize revenue & Costs
  - Up to 10 different categories may be defined
- Three labor costing methods
- Job summary information
- Drill-down detail by category
- Material management
- Historical Graph
- WIP functionality

Costs		Revenue	
PO Est. Cost Total	\$7,228.33	SO Total	\$43,305.84

## Asset Tracker

*Keep track of your assets with ease*

### Business Benefits

Track fixed assets, vendor items, software, rental units or anything with a unique identifier through a purchase to the sale/implementation cycle and easily associate that asset with all repairs, add-on materials, & more.

- ✓ Automate your asset tracking process in NetSuite
- ✓ See instantly all information about your asset:
  - Where the asset is stored
  - How it is distributed to locations & customers
  - Units sold & when to replenish inventory
  - Service history

### Features

- e-Asset Tracker gives you the ability to know:
  - What is the asset?
  - Where is the asset?
  - Who owns the asset?
  - Who can service the asset?
  - How can the asset be serviced?

## Depot Repair

*Lean and efficient repair processes*

### Business Benefits

Clear visibility into pending returns and repair status and the ability to track location of repair unit through the entire repair process.

- ✓ Real-time visibility into status of unit during the repair process
- ✓ Collaboration between repair-service and third party providers
- ✓ Historical data maintained on the unit record

### Features

- Returns handling and serial number tracking
- Return material authorization (RMA) processing
- Repair order management
- Loaner management
- Flexible location definition for fixed and virtual inventories

The screenshot displays the Epiphany Service Management interface with several panels:

- Reminders:** 10 Return Authorizations to Approve, 5 Return Authorizations to Receive, 142 Orders to Fulfill.
- Recent Records:** List of recent work orders and contracts.
- Settings:** Personalize Dashboard, Set Preferences, Edit Custom Tab.
- Today's Cases:** Filtered view of cases for 3/26/2013. Total Found: 11.
