

## e-Allocations

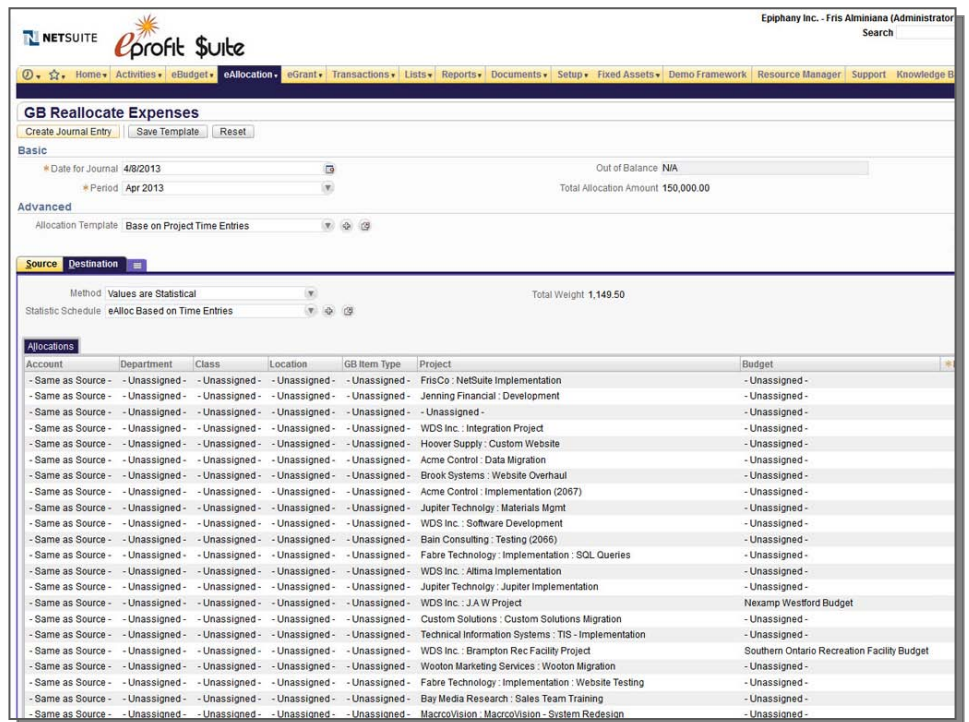

### Statistical and Automated Allocations

#### Functions of Epiphany's e-Allocations include:

- Allocate GL Accounts to one or more other GL Accounts with segments.
- Limit source account by Project, Grant, Budget and Item Type (category) in addition to standard NetSuite segments (class, department and location).
- Allocate destination account to Project, Grant and Item Type (category) in addition to standard NetSuite segments.
- Allocate by Statistical method in addition to the amount and percentage methods, e.g. by headcount, based on project time entries, and many more.

Epiphany's e-Allocations delivers a powerful Allocation Management solution for NetSuite. e-Allocations enables you to easily track statistical allocations by department, class, location subsidiary, employee, time and more.

Developed 100% in NetSuite's SuiteCloud development platform, e-Allocations leverages the power of the leading Cloud-based ERP/Financial management suite. By extending NetSuite's accounting functionality, e-Allocations gives you the ability to perform statistical and automated allocations using native NetSuite searches to define your allocations.

Founded in 2002, Epiphany has provided NetSuite services and solutions to hundreds of companies using NetSuite locally and internationally.

Our portfolio of industry solutions allow companies to manage essential business processes while leveraging the power of NetSuite.

**We make it YOUR Cloud!**
