RP Visual Solutions Releases Mobile Matrix Portable Display

Anaheim, Calif. May, 2013 – RP Visual Solutions (RPV) has recently launched a new solution in their panel matrix line of products—the Mobile Matrix. The RPMM Mobile Matrix (Deployable Matrix VideoWall) for flat panels is the industry’s first portable, deployable mounting solution, making it perfect for rentals, tradeshow, and portable videowall applications.

The RPMM Mobile Matrix comes pre-assembled, ready for four flat panel Displays, and ships in its own durable road case. The Mobile Matrix’s design is ideal for quick set-up and tear-down, usually taking less than 5 minutes. Panels can be left installed for shipping as well—making set up even easier. It comes in two variations—one configured for 46” panels, and another designed for 55” displays. Once set up, the bottom of the panel has a minimum height of 29’ from the floor, with a maximum height of 42” when fully deployed. Once in the fully raised position, the dual panel doors can be swung open to either a flat 180 degree orientation, or positioned anywhere in between, enabling the system to be powered up for use.

“For anyone doing 2x2 product demos, tradeshow, or customer presentations on a regular basis—this display solution rocks and is an absolute must see at InfoComm,” said Product Specialist Shaun O’Brien, “One set-up and the cost of the mount is paid for.”

RPV will be exhibiting in booth #2933 at InfoComm this June in Orlando showing innovative ways to mount flat panel arrays.
