RP Visual Solutions Continues to Enhance Appearance of Christie MicroTiles

Anaheim, Calif. May, 2013 – RP Visual Solutions (RPV) has recently completed another successful installation of [Christie® MicroTiles®](#) in the [Christie®](#) Cypress, Calif. Headquarters, utilizing our custom-designed mounts. Christie and RP Visual Solutions have worked on many Christie MicroTiles projects together since the display solution was launched.

RPV first installed Christie MicroTiles in Christie’s Cypress USA headquarters in 2010, with an elevated, tilted, 5 x 10 Christie MicroTiles array that overlooks the lobby below. Earlier this year, we headed north of the border to set up our mounts in Christie Canada’s headquarters in Kitchener, Ontario. This installation of 186 Christie MicroTiles showed the unique arrangements possible with the product, resulting in several striking, unique, and towering arrays mounted on the perimeter of the elevator. And most recently, we returned to the Cypress office to complete our largest installation for Christie to date—an angular, curved array of 108 Christie MicroTiles displayed prominently on the rounded wall behind the reception area.

“RPV’s approach to custom mount design is a great fit for MicroTiles’ unique display possibilities,” said Product Specialist Tiffany Kautsky, “which is why companies like Christie trust us to provide mount solutions for their challenging arrays.”

RPV will be exhibiting at InfoComm this June in Orlando at booth 2933 showing innovative ways to mount Christie MicroTiles.
