RP Visual Solutions and PQ Labs Announce Strategic Partnership

Anaheim, Calif. May, 2012 – rp Visual Solutions (RPV), a manufacturer of innovative mounting solutions, expands our offerings to our customers to incorporate multi-touch solutions utilizing PQ Labs touch technology. This partnership will expand both companies’ offerings to include LARGE Format Touch Solutions. Integrating touch solution across our full line of rear projection, matrix panel arrays, and large format displays will enable our customers a single integrated solution source for their MULTI-TOUCH Solutions.

Wei Liu, VP of Business Development for PQ Labs, states “We are so pleased to have a partner like RPV to expand our offerings and capabilities and to seize on the explosion of large format panels, such as the Panasonic 103 and MATRIX solutions where you have a touch environment larger than a single panel.” Randy Pagnan, President of RPV concurs adding, “No question PQ labs’ new Multi-Touch G⁴ solution represents a very compelling solution offering 6, 12, and 32 Touch capabilities. Our value-add is integrating this touch component with decorative bezels, protective and non-glare substrates, and most importantly, service to the electronic components.”

The combination of RPV’s design and fabrication capability with PQ LABS Infrared technology enables our collective customers to realize their unique large format touch projects.
