

# CREDENTIALING THE SYMPLR WAY

CREDENTIAL ANYBODY AND EVERYBODY IN YOUR FACILITIES

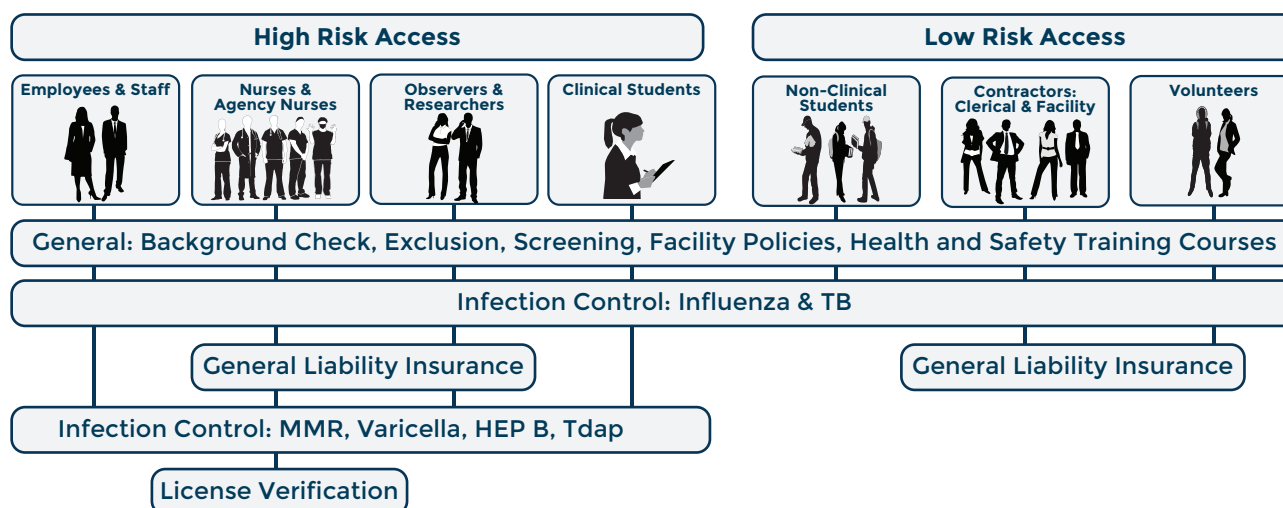

Credentialing is a critical requirement for any facility. Implementing the right solution ensures the security of your facility, the safety of your patients, and enables you to meet compliance requirements.

Vendors. Nurses. Students. Volunteers. Consultants. Contractors. These are just some of the people that need to be credentialed and the list is growing. Add to that, the different departments and business owners involved in implementing and managing your credentialing program, and it can quickly become overwhelming and unmanageable.

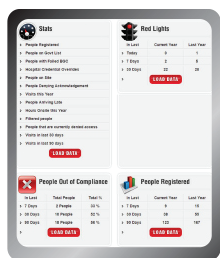

That's where we can help! symplr credentialing is exactly that – a simpler way to manage credentialing for EVERYONE accessing and coming onsite at your facility or network of facilities. Fully customizable to suit your unique needs and tailored to each group of people you need to credential – thousands of facilities nationwide trust their credentialing to symplr.

## CHECK OUT THESE BENEFITS:

- **Flexible Credentialing** – Customize credentialing requirements for your different groups based on the needs of your facility or network of facilities.
- **Rapid Implementation** – A web-based solution, coupled with our extensive experience, means you're up and running in just a few days. Plus, no expensive hardware to purchase or maintain.
- **Analytics & Dashboards** – "Single pane of glass" visibility of critical data across your facility/facilities to ensure compliance with your policies.
- **Automated Administration** – Gives you control of your credentialing program: schedule appointments, add new users, and grant or deny access with ease.
