

Exclusion Screening

Fast, accurate screening

Protecting against hiring or doing business with excluded or debarred individuals or entities is a must for any healthcare organization. Checks must be performed regularly and properly.

Although these checks are among the least costly compliance processes, they can expose you to severe civil monetary penalties (CMP) and compromise your facility's safety, security, and livelihood if not done correctly.

“symplr is a well balanced combination of technology and remarkable customer service.”

— J. Ziegler

There's a symplr way! Our web-based exclusion screening solution can help you save time and money, and more importantly, reduce the risk of human error that may lead to costly mistakes.

Our in-house team of research specialists, coupled with our sophisticated “search and match” software algorithms, provide faster, more accurate screening results. We leverage all available state and federal exclusion lists to return one of the best verified exclusion match results in the industry.

Easy to Implement

Completely web-based means you are up and running in minutes.

Administrative Dashboard

Real-time status updates of exclusion screening checks as they are being processed.

Batch Search

Get verified exclusion match results for employees and entities, easily and quickly, via the batch load process.

Instant Search

Perform exclusion screening checks on individuals or entities with instant results.

Analytics & Reports

Access and review reports simply, at any time. Export for additional data analysis and auditing.

Industry-Leading Customer Support

symplr views customer support as an ongoing commitment to your success.
