

Professional Practice REPORTING

COMPREHENSIVE PROVIDER ANALYTICS

Knowing exactly how your providers are performing via analytics, such as procedure volumes, readmission rates, length of stay, mortality rates, and benchmarks, allows for a comprehensive, holistic insight into the quality of your providers.

Professional Practice Reporting from symplr gives you a complete overview of the quality of care demonstrated by your providers. Review Inpatient and Outpatient Data with detailed analytics on case counts by physician role, top DRGs (Diagnosis Related Grouper), diagnosis codes, discharge codes, and complication codes. Robust provider reporting is made easy with QPI from symplr.

CHECK OUT THESE BENEFITS:

- Comprehensive Oversight Import your billing history to create a single source of truth for each provider's quality of care.
- Powerful Analytics High-level details about a provider's episodes of care allows for drill-down to specific patient case details.
- Provider Benchmarking Provides advanced analysis into each individual provider's performance, as well as their performance against providers in their department/specialty and providers hospital-wide.
- Configured with ICD/CPT Codes Get privilege to procedure reports when providers are granted privileges using our exclusive, patent-pending technology. Quickly determined number of procedures performed in which the provider has granted privileges. As well as procedures performed in which the provider isn't granted privileges!
