### Voicebrook to Exhibit at APIII

#### Voicebrook to demonstrate VoiceOver® Enterprise integrated speech recognition and digital dictation solution for Anatomic Pathology

**LAKE SUCCESS, NY September 18, 2009** – Voicebrook, a leading provider of integrated speech recognition and digital dictation solutions in healthcare, will be exhibit at the Advancing Practice, Instruction & Innovation Through Informatics (APIII) conference. The conference is being held at the Marriott City Center Hotel in Pittsburgh, PA from September 20<sup>th</sup> through the 23<sup>rd</sup>, and members of the Voicebrook team will be on-site in Booth 11.

Voicebrook's VoiceOver® Enterprise solution is currently integrated with leading Anatomic Pathology (AP) systems, and is deployed in more than 90 hospitals and laboratories across the United States and Canada. It features the most accurate speech recognition technology (Dragon® Medical 10), powerful self-edit tools, and a robust templating system—pathologists navigate by voice and dictate their reports directly into their underlying AP system in a hands-free laboratory environment. Pathologists can dictate, review, and sign-off on their reports in real time, eliminating the need for third-party transcription, or they can elect to use the VoiceOver Recorder, which enables them to create digital dictations that are routed for deferred transcription. This combination of real time speech recognition tools coupled with the ability to use digital dictation provides customers with a complete reporting solution that can meet the needs of the most diverse Pathology laboratories.

E. Bruce Sopko, VP Sales said, "We are excited to be exhibiting at the 2009 APIII Conference. Voicebrook believes that the APIII Conference is the premier technology conference in the Anatomic Pathology space, and we are proud to have been a part of it for the past five years. This is a great opportunity for us to meet with customers and colleagues and discuss new technologies that affect the Anatomic Pathology community."

#### **About Voicebrook**

Voicebrook is a leading provider of integrated speech recognition and digital dictation solutions for automation of clinical documentation. Voicebrook's VoiceOver® Enterprise software integrates directly with most healthcare information systems, and has been widely deployed in Pathology throughout the US and Canada. Voicebrook has developed specific best practices for implementation and on-going support, ensuring the most successful deployments of integrated speech recognition technology for healthcare.

**About APIII**

APIII is an annual educational conference designed for world wide collaboration, technology and learning to come together in one meeting place. APIII offers direct interaction with physicians, researchers, residents and graduate students, Industry-related developers, engineers, imaging informatics professionals, vendor representatives and many others interested in how informatics and imaging are transforming pathology, oncology and radiology. For more information, please visit <http://apiii.upmc.edu>.
