Voicebrook to Exhibit at 2010 PowerPath® Users Conference

Company to demonstrate industry-leading solutions at Impac's 2010 Annual Users Group Meeting in Amelia Island, Florida

LAKE SUCCESS, NY May 17, 2010 – Voicebrook, the leading provider of integrated speech recognition and digital dictation solutions for Pathology, today announces that it will be attending Impac's 2010 PowerPath® Users Conference in Amelia Island, Florida. The Conference is being held from May 17th through the 21st, and members of the Voicebrook team will be available to discuss solutions and provide demonstrations.

Voicebrook's VoiceOver® Enterprise solution is currently integrated in approximately 20 laboratories that are running Impac's PowerPath® anatomic pathology System, and is deployed in over 125 hospitals and laboratories across the United States and Canada. It features the most accurate speech recognition technology (Dragon® Medical 10), powerful self-edit tools, and a robust templating system. When combined with our VoiceOver® PowerPath® workflow Personality, pathologists navigate by voice and dictate their reports directly into PowerPath® in a hands-free laboratory environment.

The VoiceOver® PowerPath® Personality includes a comprehensive collection of voice commands and productivity tools that enable PowerPath® users to achieve the highest level of success with speech recognition technologies. Pathologists can dictate, review, and sign-off on their reports immediately, eliminating the need for third-party transcription, or they can elect to use the integrated VoiceOver Recorder or Delegated Medical Editing add-on, which enables users to create digital dictations that are routed for deferred transcription or third-party editing. The combination of real time speech recognition and traditional transcription workflow tools provides our customers with a complete reporting solution that can meet the needs of the most diverse Pathology laboratories.

E. Bruce Sopko, VP Sales said, "We are excited to attend the 2010 PowerPath® Users Group. We have attended this meeting for each of the past six years, and we enjoy meeting with our existing clients, the Impac team, and other PowerPath® sites who are considering our products. We look forward to working with Impac to help make this a successful event, and encourage attendees to stop by and discuss the many benefits of our integrated reporting solutions."
