Voicebrook Expands Pathology Team

Taps industry veteran, Rick Levine, to further strengthen its leadership in providing speech recognition solutions for Pathology.

LAKE SUCCESS, NY April 26, 2010 -- Voicebrook, Inc. today announced the appointment of Rick Levine as Senior Specialist, Pathology Solutions. In this position, Mr. Levine will have varied responsibilities for pre- and post-sale customer activities, and will be a member of Voicebrook's product development team.

"Voicebrook has been experiencing an acceleration in demand throughout North America for our integrated speech recognition and digital dictation solutions in Pathology. We are extremely pleased to add Rick to the team as we enter the next phase of our growth," said Joe Desiderio, President of Voicebrook. "Rick's customer focus and experience in the industry -- dating back to the first commercially available speech recognition solutions for Pathology – will make him a key contributor for customer engagements and new products in development."

Mr. Levine joins Voicebrook from Nuance Communications where he most recently served as the Senior Project Manager for Dragon Medical solutions. Having been involved with speech recognition in Pathology since 1995, Rick has experience integrating speech recognition software with most major Anatomic Pathology systems. Over the past 15 years, he has been involved in numerous speech recognition implementations in Pathology throughout North America.

"I am excited to be joining Voicebrook where I will have the opportunity to focus my efforts on helping laboratories be more successful with speech recognition and reporting solutions," Levine said. "Voicebrook has demonstrated a commitment to helping the Pathology community achieve the maximum benefits from their investments in speech recognition technologies. I look forward to joining an organization that shares my philosophy concerning Pathology and speech recognition."

Prior to his tenure at Nuance, Mr. Levine was responsible for delivering and developing speech recognition solutions at Lernout & Hauspie and Kurzweil AI. He also has held sales, marketing, and support roles since his employment at Kurzweil AI, where he was the Product Manager for VoicePath, the first commercially available voice recognition application for Pathology. Rick holds a BA degree from Duke University and an MBA from Boston College.
