Voicebrook to Exhibit at 2009 Cerner Health Conference

**Voicebrook to demonstrate VoiceOver® and discuss strategies for
successful speech recognition deployment**

LAKE SUCCESS, NY October 3, 2009 – Voicebrook, a leading provider of integrated speech recognition and digital dictation solutions in healthcare, today announces that it will be exhibiting at the 2009 Cerner Health Conference in Kansas City, Missouri. The Conference is being held on October 4th through October 6th, and members of the Voicebrook team will be available in Booth 119 for product discussions and demonstrations.

Voicebrook's VoiceOver® Enterprise solution is designed to leverage existing investments in Hospital Information Systems (HIS), Radiology Information Systems (RIS), and Anatomic Pathology (AP) Systems by adding speech recognition and templating as text input tools. Seamless integration ensures easy access to speech recognition technology and digital dictation from within existing applications. Medical professionals continue to interact with existing systems while combining the power of voice, templating, and input devices that are designed for their environment and workflow.

VoiceOver® Enterprise integrates directly with all Cerner information systems, including Classic®, CoPathPlus® and Millennium®, and has been widely deployed throughout the US. Voicebrook's software and services extend beyond core Dragon® Medical solutions and ensure the highest levels of success with speech recognition, while also providing the flexibility for users to choose between front-end speech recognition and traditional transcription workflows. VoiceOver® can be deployed as an upgrade to a Dragon® Medical implementation, allowing sites to protect initial investments, and realize the full potential of speech recognition and complementary workflow technologies.

Joseph Desiderio, President of Voicebrook said, "We are excited to be participating in the Cerner Health Conference this year, and we look forward to showing our products and sharing our experiences with some of the most prestigious healthcare organizations in the country. We feel that our approach to integrating and delivering speech recognition technology within Cerner's full product suite can help Cerner customers finally capitalize on the promised benefits of speech technologies."

About Voicebrook
Voicebrook is a leading provider of integrated speech recognition and digital dictation solutions for automation of clinical documentation. Voicebrook's VoiceOver® Enterprise software integrates directly with most healthcare information systems, and has been widely deployed in Pathology throughout the US and Canada. Voicebrook has developed specific best practices for implementation and on-going

support, ensuring the most successful deployments of integrated speech recognition technology for healthcare.

About the Cerner Healthcare Conference
The Cerner Health Conference (CHC) is Cerner's annual industry-leading event for healthcare leaders, clinicians, information technology specialists, practice managers, employers, consumers and industry professionals. Attendees learn about key issues affecting healthcare, network with peer organizations and explore Cerner and their partners' solutions in the Solutions Gallery.
