

NEXAWEB TRAINING

Nexaweb offers comprehensive training to get your development team up and productive quickly. Our training professionals have deep knowledge of our products and system development. With a strong focus on hands-on exercises and classroom discussion of real-world projects, students will leave class with the skills they need to succeed quickly.

Training at Nexaweb Headquarters

Nexaweb offers free, two-day training classes at our headquarters in Burlington, Massachusetts on a regular basis. While there's no charge to attend this training, we do ask that you register before attending. Contact our training team at training@nexaweb.com to schedule and confirm your participation.

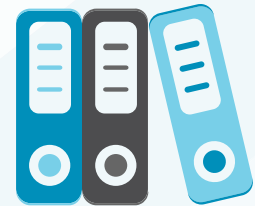

Training at Your Location

If you find it more effective to have training delivered at your facility, the Nexaweb training team will work with you to arrange on-site delivery.

Custom Training Programs

Nexaweb Training can also deliver training customized to your specific needs. We will work with you to develop an appropriate agenda, delivered on site with a full complement of course materials and hands-on exercises to ensure that your team maximizes the learning experience.

Courses

Whether delivered at Nexaweb or at your facility, the agendas for our courses remain the same.

Introduction to Nexacro Platform

Day One:

- » Creating a Project
- » Creating a Query Screen
- » Creating a Registration Screen

Day Two:

- » Style, Image and Theme
- » Layout
- » Main Application
