FASTPATH AUDIT VIEW
GET THE RIGHT DATA TO THE RIGHT PEOPLE AT THE RIGHT TIME

Fastpath Audit View allows the business user to easily schedule and deliver audit reports on an as needed basis without needing assistance from the IT department. Whether you want to analyze segregation of duties on quarterly basis or end user security each month, Audit View offers the flexibility and reporting you need.

The Audit View Reports Wizard allows the business user to select criteria for a given report and save that criteria for use whenever they need it. With just a few clicks, you can schedule reports to be delivered to the right person in the format they require.

Fastpath Audit View puts the audit data your company needs in the hands of the right user on a timely basis leading to better business processes.

FEATURES

- Audit report design and scheduling tool for business users
- Save key audit reports for easy re-creation
- Define custom report schedules (daily, weekly, monthly)
- Scheduled reports emailed to any user via Excel or PDF attachment

PRODUCT BENEFITS:

Easy Access and Analysis
Fastpath Audit View allows a user fast access to Acumatica data. Whether you are a CFO or an auditor, the easy-to-use interface makes finding and analyzing data simple.

Designed for the Business User
The tool is designed for business users,not just IT professionals. With just a few clicks,you can identify the business data you are interested in and how often you want to see it.

Build and Manage and Audit Plan
The Audit View Review Planner delivers an invaluable control road map for your internal and external audit teams. Users can easily create periodic reviews and assign them to end users. Standard delivered management and exception reports make it easy to track the activities and sign offs throughout the review process.

Flexible and Easy to Use
Fastpath Audit View is a stand alone Microsoft .NET application that is flexible and easy to use. The application is easy to install, configure, maintain and does not require additional Acumatica users.

> " Fastpath's products are designed for companies like ours and are easy to implement. With the standard templates for audit trail and conflict lists for SOD included with the product, we are able to generate meaningful reports in a matter of hours now vs. days or sometimes weeks before. "
