*** Determination of volume: When starting a new service, the volume category (small, medium, large or unlimited) is determined based on information from the customer on the expected average total number of records updated per day and the size of the data. In general the small volume allows up to 100 records updated per day, medium volume allows up to 250 records updated per day, large volume allows up to 1000 records updated per day and the unlimited volume allows unlimited records updated per day. However, exceptions may be made – please ask us. The categorization of volume will be revised periodically.
