On-Demand Data Integration & Data Migration

RapidiOnline provides fast and easy hosted data integration and migration solution. RapidiOnline provides pre-configured standard data integration set-up that are ready to use immediately after subscribing to our service. The configuration can easily be extended and adapted to your specific needs.

BUSINESS NEEDS

Data Synchronization
The need to synchronize e.g. customers, accounts, product information between e.g. a CRM and an ERP system.

Access to up-to-date Data
The need to have Real-time access to fresh customer data on demand.

Data Migration
The need to migrate e.g. customers, transactions etc. from an old to new system.

We support systems like Microsoft Dynamics NAV/CRM/ AX/C5/RMS, salesforce.com and NetSuite. You pay a fixed monthly fee and there are no extra costs for software maintenance and updates. You only pay as long as you use the service and you only pay for the functionality needed.

FEATURES

Rapid Implementation:
Pre-configured standard set-up. Additional objects and fields can be configured.

RapidiConnector:
Unique technology that ensures fast and secure data communication between the systems.

Safe and secure:
Direct and transaction safe data transfer without storing data outside the systems.

3 Different Versions:
Light: When only a few objects need to be integrated
Standard: All objects can be integrated
Advanced: Additionally full access to Web 2.0-based configuration application.

The integration solutions at RapidiOnline eliminate duplicated data entry and replicates data so that the users of each system benefit from up-to-date data. We provide a pre-configured set-up for some configurations, which e.g. integrate account, product and pricelist information between a CRM and an ERP system – easily and securely.

BENEFITS

Fastest time to market:
- Rapid Implementation: Pre-configured
- Up and running in no time!
- Configuration, no coding.
- Data Integration within days instead of months

Lowest Costs:
- No initial licensing costs
- Fixed monthly fee
- Fixed price for configuration
- No extra costs for maintenance and updates
- You only pay as long as you use it
- You only pay for the functionality needed

Business Improvement:
- Always up-to-date data
- More efficient business routine
- More efficient interactions with customers
- Improved customer service
- Improved sales conversion rates
- Liberating valuable resources

Flexible solution:
- Pre-configured integration set-up
- Easy to adapt and extend to your specific needs
- Easy to extend with custom developed objects

SUPPORTED SYSTEMS
& DATABASES

Microsoft Dynamics NAV
Microsoft Dynamics AX
Microsoft Dynamics C5
Microsoft Dynamics XAL
Microsoft Dynamics CRM
Microsoft Dynamics RMS
Salesforce.com
NetSuite
Oracle
VISMA
TimeLog
IBM DB/2
IBM DB/2 on iSeries
MS-SQL Server
ODBC
Lotus Notes
Sybase SQL Anywhere
Sybase Mobilink
(PDA replication)
MySQL
PostgreSQL
Navision 3.56
Navision Financials
Navision Attain
MBS-Navision 3.70 and 4.0
NAS Connector
etc.

THE RAPIDICONNECTOR

The RapidiOnline Services run with a unique technology called the RapidiConnector that ensures compressed and secure data transfer between RapidiOnline and the different On-Premise systems. For the best efficiency and security the data is packed and compressed. The data stream can optionally also be encrypted.

Our aim is to provide services that take advantage of this unique technology in order to make it easier and faster for you to get started. Our unique technology ensures that the On-Demand solution is working just as efficient as the On-Premise version.

The RapidiConnector resides in your On-Premise network connecting outbound to the central RapidiOnline Service and enables two-way communication between Rapidi-Online and your On-Premise systems.

This has the advantage that you don't have to change anything in your network or firewalls in order to deploy RapidiOnline integration. The connections from the RapidiConnector are all outbound to RapidiOnline. No inbound connections are made and no inbound ports have to be opened in your firewall. Your internal systems stay secured and protected. This makes it very easy to get started.

The communication between RapidiOnline and the RapidiConnector is using a pro-prietary protocol which is highly efficient in terms of reducing the total amount of data and the number of packages sent and received to an absolute minimum. The protocol first joins e.g. 50 records in 1 package thereby stripping off all Meta information, so that only the relevant data is sent. Furthermore the package is compressed before sending.

This results in the most efficient data transfer. This method can reduce the amount of data needed to be sent by a factor up to 50. This means e.g. instead of sending 1000 bytes for each customer record the RapidiConnector only needs to send 20 bytes. This reduces both the time and the bandwidth needed dramatically.

Because of the proprietary protocol and the compression it is practically impossible to decipher the data transmitted. This increases the security. If extra security is needed the data can also be encrypted.

About RapidiOnline

RapidiOnline provides agile data exchange and data integration solutions - delivered both as on-demand or on-premise solutions. Our mission is to revolutionise how the world engages and deals with their data and systems – transforming data integration from a complex to a simple task. Since 1987 RapidiOnline's products have delivered value with a compelling combination of performance, flexibility and reliability. RapidiOnline has customers worldwide, that rely on us to manage and integrate their critical data. RapidiOnline is based in Denmark and France. Sign Up for a Trial already today!
