MANAGED MAINTENANCE

The rising cost of maintenance is an ongoing concern for Fleet Managers. Keeping track of which vehicles require servicing and making sure that only genuine and necessary maintenance is conducted is a further time-consuming activity, which adds to your already heavy schedule.

The Avis Fleet Managed Maintenance product takes care of all these problems. Once you select this service you can count on us to take the worry out of your fleet-maintenance management while at the same time reducing the cost of your monthly maintenance.

Our specially trained technicians take your calls

The Avis Fleet Maintenance Call Centre is manned by trained technicians who will check the vehicle history on the database and ensure that manufacturer's guidelines are followed and only necessary maintenance work is approved. This service includes:

- screening and approving maintenance requests against our extensive parts, labour and manufacturer service operations databases

- checking for work that should be performed under warranty, as well as service or maintenance plans
- checking supplier job cards and invoices before making payment
- providing a consolidated tax invoice monthly for the whole fleet
- provision of exception reports
- monthly fleet reports to curtail costs
- provision of monthly management reports of fixed and variable costs.

A contract to keep you safely on the road

Select an Avis Fleet fixed premium maintenance contract and leave the rest to Avis Fleet for a set number of kilometres. There are no hidden costs and fleet discounts on labour and parts are passed on to you. The fixed monthly premium includes:

all mechanical repairs and manufacturer specified maintenance
tyres
battery, exhaust and electrical
component replacements resulting from normal fair wear and tear.
