

## Addison Auto Repair & Body Shop Partners with Colorado Child Passenger Safety Team

Addison Auto Repair & Body Shop is a Child Safety Seat Fit Station

Denver, CO – September 2010 –Addison Auto Repair & Body Shop joined the National Child Passenger Safety Program by adding two Certified Technicians to their staff. This endeavor is a community service done by appointment.

It's a fact; in Colorado more than 80% of the child safety seats inspected by **CPS Team Colorado** were improperly installed. Used properly, child safety seats and seat belts prevent injuries and save lives.

Common questions asked by parents, grandparents and guardians are:

- What is the safest placement for the car seat(s)?
- How should I install multiple car seats?
- Should I use lap/shoulder belt or latch installation?
- Where do I attach the tether strap?
- Is the car seat installed tight enough?
- Where do I go for car seat recall information?

Jim Addison said, "Each car and each safety seat is different. By using the instructions in the vehicles owner's manual and the car seat manual you can usually decide the safest method for the installation, however, an installation isn't always straight forward. Newer cars are equipped with helpful options but older vehicles present more challenges."

Brenda Addison said, "An auto shop is a great place to have a Child Passenger Safety Fit Station. We see many families taking car seats in and out of rentals and their own vehicles. Unfortunately, many fire stations are no longer performing this public service. It's been a labor of love to be able to help parents, grandparents and caregivers learn the safest method of installation."

If Addison Auto Repair & Body Shop can help you, call the office at 303-691-9484. Appointment times are 9 AM to 4:30 PM, Monday through Thursday. Bring your vehicle owner's manual, car seat manual and allow 30 to 45 minutes for fitting and training.

### About Addison Auto Repair & Body Shop

Addison Auto is a full service general repair and collision center in southeast Denver. In the last 28 years Addison Auto Repair & Body Shop has evolved from a small specialty repair shop working on only one make, to a combination body and repair facility working on all makes while specializing in Subaru, Volvo and Honda. Other services include; brakes, engine, drivability and "check engine light" diagnostics, alignments, muffler and exhaust, engine, transmission, tires, and paintless dent repair.
