

Taking Care of What You Own for Three Decades!

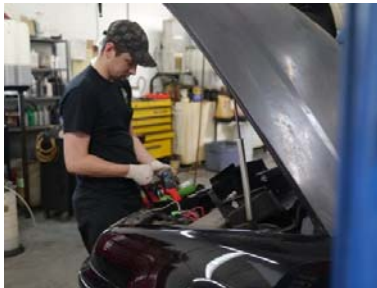

Addison Auto Repair & Body Shop European Repair & Service Specialists

Autologic diagnostic tool enables independent repair shop to specialize without having to involve the dealer.

Denver, CO (PRWeb) October, 2014. Keeping up with quickly changing technology of modern vehicles requires specialized equipment and training and Addison Auto Repair & Body Shop is committed to spend the time and money it takes to stay up-to-date with today's automotive technology.

Diagnostics Tool - Addison Auto Repair & Body Shop recent acquisition of the Autologic tool <http://www.autologic.com/en/pages/information-downloads/technical-specifications> allows us to take on any repair or service for BMW, Mini Cooper and Audi.

Talent - Todd Kirkland, ASE Master Technician +L1, loves Europeans... not the people, the cars! The more obscure the country or the tougher the name to pronounce, these brands are in Todd's wheelhouse. Any European training that comes to townTodd is there. Todd has been in the automotive industry since 1999 and can handle any make, model, or problem but the brands he likes best are Audi, BMW, Mini Cooper, VW, Mercedes-Benz, Land Rover, Volvo, Saab and Porsche.

Todd Kirkland, ASE Master Technician +L1
