Our HRO Service...

We assist each HRO client with an initial assessment of their current HR practices and procedures to ensure we work as a partner for future growth. Our HRO platform ensures that every client receives not only compliance protection, but also provides an opportunity to take advantage of our advanced HR Consulting services.

We use the initial HR assessment to determine the areas that need improvement while also maintaining the areas that are already strong. To address the diverse needs of each HRO client we start the assessment with a custom employee handbook and build from there to determine what, if any, future advanced HR support will be required.
