

# V-LINE<sup>™</sup> Cabinet Systems Next Generation

## **Product Introduction**

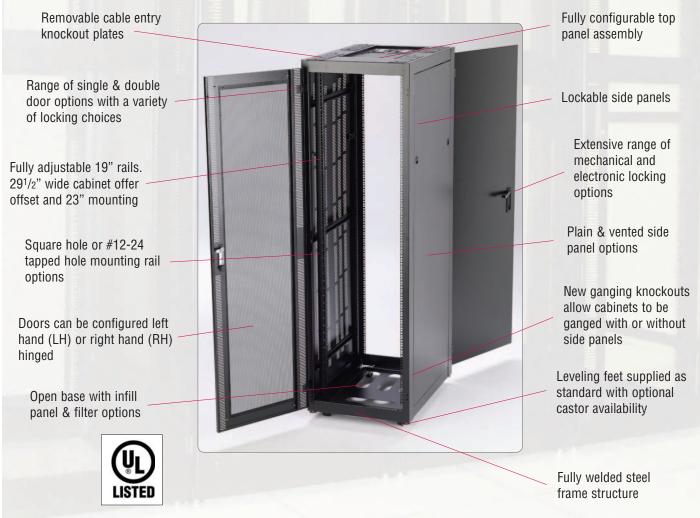

Today's competitive electronic enclosure market requires cost effective products that deliver superior performance and function. Cooper B-Line developed the V-LINE<sup>™</sup> cabinet platform to support the growing need for a competitively priced solution.

Many innovative features are designed into the V-LINE cabinet platform, offering valuable benefits for users. The heart of the system, the cabinet frame, has standard

features, such as, fully adjustable mounting angles with RMU markings, removable and replaceable cable entry plates, and leveling feet. The frame can be fitted with a range of options including solid or vented side panels, a variety of door styles, and top or bottom panels. The V-LINE cabinet features excellent aesthetic characteristics and is built to the high quality standard our customers have come to expect over the years from Cooper B-Line.

All of these features, good looks and high quality are offered at a competitive price point, making the V-LINE cabinet an excellent choice for anyone needing to house data communications equipment while watching the bottom line.

## The V-LINE<sup>™</sup> Cabinet Advantage

Standard cabinet finish is a Black hard wearing epoxy polyester powder coat paint, color reference RAL 9005. Cabinets are also available finished in Light Gray, reference NCS 1502-Y, but may be subject to increased lead times.

## Cabinet System

**Basic Dimensions** 

The V-LINE<sup>™</sup> cabinet platform is designed to provide high quality enclosure solutions to the market at competitive prices and short lead times. Ordering the V-LINE cabinet solution can be done by ordering individual components or ordering a configured enclosure solution with a single part number.

Use the following matrix to build the part number for your desired V-LINE cabinet configuration.

|        | V  | V-LINE Cabinet<br>Range                     | Options  |  |  |

What features do you require for your electronic cabinet solution? Whatever you require, you can be sure that the V-LINE cabinet platform from Cooper B-Line will meet your needs. For assistance with selecting the optimal cabinet solution for your network, contact a Cooper B-Line sales representative or call our sales engineering department at (800) 851-7415.

Most day to day network installations incorporating low density active equipment, as well as low volume structured cabling systems, can be accommodated into what has evolved to be an industry standard network cabinet.

#### V-LINE<sup>™</sup> Network Cabinets are comprised of the following features:

- Welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- Acrylic glazed door with vented styles fitted front, supplied with standard locking swing handle (door right hand hinged)
- Plain steel door fitted at the rear and supplied with standard locking swing handle (door right hand hinged)
- Plain side panels fitted both sides
- Vented top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

## If the standard specification cabinets shown do not meet your application requirements, use the "Easy Step Configurator" on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Cabling Cabinet

For applications housing structured cabling systems, it is often necessary to employ wider cabinets to adequately accommodate the back bone cabling, as well as provide space to manage the patch cords.

#### V-LINE<sup>™</sup> Cabling Cabinets are comprised of the following features:

- 29<sup>1</sup>/2" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- Acrylic glazed door with vented styles fitted front and configured with standard locking swing handle (door right hand hinged)
- Plain steel door fitted at the rear and configured with standard locking swing handle (door right hand hinged)
- Plain side panels fitted both sides
- Vented top panel
- Supplied with pack of Fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

## If the standard specification cabinets shown do not meet your application requirements, use the "Easy Step Configurator" on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

## Server Cabinet

Forced air remains the most common and reliable method for cooling electronics. Most common servers and switches incorporate fans to draw cool air into the unit and exhaust warm air out of the unit.

Although other environmental considerations need to be made, the number one priority when specifying a suitable server cabinet configuration is to ensure sufficient air is able to both enter the cabinet and be exhausted out of the cabinet. This is most commonly achieved by fitting high flow vented doors offering around an 80% free area on the front and the rear of the cabinet.

Cooper B-Line recommends the use of wider cabinets when side to side heat dissipating equipment, such as switches, are deployed. See the V-LINE<sup>™</sup> Switch Cabinet details on page 9 for further details and suggestions.

For higher density applications the V-LINE range offers a series of modular accessories designed to help enhance the internal operating environment within the cabinet space, helping to avoid hot air crossover and the risk of hot spots.

#### V-LINE<sup>™</sup> Server Cabinets are comprised of the following features:

- 24" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented doors fitted front and rear, configured with standard locking swing handles (doors right hand hinged)
- Plain side panels fitted both sides
- Plain top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

## If the standard specification cabinets shown do not meet your application requirements, use the "Easy Step Configurator" on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

Switch Cabinet

For applications where side to side vented equipment is installed, Cooper B-Line recommends the use of wider cabinets configured with the mounting rails fitted centrally. This cabinet configuration allows the supply of air to be adequately provisioned at the equipment air intake location and helps to avoid back pressure at the equipment exhaust. Like the V-LINE<sup>™</sup> Server Cabinet range, the V-LINE Switch Cabinet can be fitted with a range of modular accessories designed to help enhance the internal operating environment within the cabinet space. These enhancements help to avoid hot air crossover and help reduce the chance of hot spots.

#### V-LINE<sup>™</sup> Switch Cabinets are comprised of the following features:

- 29<sup>1</sup>/<sub>2</sub>" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented door fitted front, configured with standard locking swing handle (doors right hand hinged)
- High flow double vented doors fitted rear, configured with standard locking swing handle (doors right hand hinged)
- Plain top panel
- Supplied with pack of fifty (50) #12/24 cage nuts and screws
- Supplied fully assembled and palletized

## If the standard specification cabinets shown do not meet your application requirements, use the "Easy Step Configurator" on page 5.

Accessories and additional options are available as detailed on pages 17 - 26.

## Co-Locate Cabinet

The V-LINE<sup>™</sup> Co-Locate Cabinet range is a completely new addition to the cabinet platform. This cabinet is available in two bay and three bay configurations, in 36", 42" and 48" depth variants.

#### V-LINE<sup>™</sup> Co-Locate Cabinets are comprised of the following features:

- 29.5" wide welded frame assembly with open base
- Supplied with four (4) off jacking feet
- Fitted with internal cable chases to provide secure cable access to each bay
- Supplied with two pair of fully adjustable 19-inch mounting rails centrally mounted in the cabinet
- High flow vented doors fitted at the front and rear of each bay, configured with standard locking swing handles
- Plain lockable side panels fitted both sides of each bay
- Plain top panel
- Supplied with pack of 50 off #12/24 cage nuts and screws
- Supplied fully assembled and palletized

## If the standard specification cabinets shown do not meet your application requirements, use the "Co-Locate Easy Step Configurator" on page 11.

Accessories and additional options are available as detailed on pages 17 - 26.

## **Cabinet Door Options**

#### Features:

- 16 gauge (1.5mm) steel construction
- Door design allows for 180° opening even when ganged together
- Factory set-up is for right hand hinge with a single point swing handle lock (except split doors which are three point swing handle locks)
- Doors are easily field reversible
- Doors are field upgradeable to 3-point latching with combination and electronic locking options
- Overall cabinet depth = frame depth + front door depth + rear door depth, each door is 1" (25.4mm) deep
- Each door is fitted with an earth grounding point
- High flow vented doors incorporate an 80% free area mesh to provide optimal air management

Doors can be factory configured with a number of locking options depending on the door type.

#### **Standard Key Locking Swing Handles**

The default standard locking option on all single door assemblies is a single point locking swing handle keyed alike. All double door assemblies are configured with a 3-point keyed alike locking swing handle assembly. 3-point locking on single door assemblies are available as an optional upgrade.

#### **Mechanical Combination Swing Handles**

Available as an optional upgrade these handles can be configured to operate in either single point or 3-point locking configurations on single door assemblies. Only available as an optional upgrade in 3-point configuration on double door assemblies.

#### i-PAL Electronic Swing Handles

Using HID proximity card technology, the i-PAL range of handles can be configured to operate in either a stand alone or networked configuration over an Ethernet network (requires i-BOX Ethernet controller). The i-PAL range can be configured to operate in either single point or two point locking configurations.

## **Cabinet Side Panel Options**

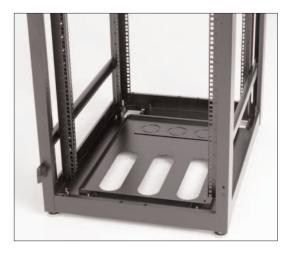

#### Features:

- Available in solid or vented and split configurations
- 17 gauge (1.4mm) steel construction
- Lift off design for easy equipment access
- Locking feature with twin side 1/4 turn latches
- Recessed lock to allow for panels to be installed between ganged enclosures
- Fitted with an earth grounding point

1100 CFM Fan

### **Caster Kit**

The caster kit features a unique, drop-in design that helps simplify the installation process. Casters have a 300 lb (136kg) dynamic load rating each allowing for a 1200 lb (544kg) dynamic load for cabinet on casters. Caster kits include four casters and installation hardware.

**Cable Entry Knockout Plate** 

Plastic Bushing

### **Removable / Replaceable Cable Entry Knockout Plates** & Plastic Bushings

These plates are designed to help maximize the area available for cable entry into the V-LINE cabinets while eliminating large open areas that would limit security, aesthetics and the ability to keep contaminants and debris out. Four of these plates are included with each frame. These 13" (330mm) x 3<sup>3</sup>/4" (95mm) removable plates feature three 21/2" (58mm) / 3" (76mm) concentric knockouts allowing numerous different cable entry options in each corner of the V-Line cabinet frame. The bottom panel also includes four cable entry knockout plates that include the same benefits as the top panel knockout plates. Optional plastic bushings fit in the openings to enhance appearance and offer additional protection for the cables.

## **Cabinet Accessories**

## **Brush Strips Cable Opening Plates**

These plates are designed to maximize the area available for cable entry into the enclosures while limiting air leakage out of the cabinet and limiting the entry of dust and debris. These 13" (330mm) x  $3^{3}/4$ " (95mm) removable plates install perfectly in the space where the cable entry knockout plates (part # VOZIP) are installed on the frames. The bottom panel also includes four spaces where this plate can be used for the same benefits when bringing cables in from the bottom of the enclosure.

### **Mounting Rail Offset Kits**

If a mounting rail offset is needed, this kit is available as a retrofit option. The offset kits allow the 19" mounting rails to be offset to the left hand or right hand side of all V-LINE<sup>TM</sup>  $29^{1}/_{2}$ " wide cabinet configurations.

Air Dam / Cable Manager Kit

This kit is used to provide a means of combining cable management fingers to organize patch cords and brush strips to help manipulate airflow through the cabinet. The 11U high cable management fingers are installed between the rack mounted equipment and the mounting rails. The brush strip sections are secured to the back of the mounting rails with plastic push-in fasteners and do not interfere with any available mounting spaces. Cable management fingers can be purchased separately.

| 79903833732 | SB860FSFB                       |  |  |

### **Cabinet Ganging Kit**

The V-LINE<sup>™</sup> Cabinet frame has been updated to include a simpler ganging facility. Each cabinet frame has knock-outs in the side members, allowing frames to be butted side by side, and simply fastened together. This feature allows the cabinets to be ganged with or without side panels fitted.

Ganging kits are include six (6) bolts and six (6) flange nuts

| 79903839125 | VLGK                            |

## **Cabinet Earthing Kit**

The universal cabinet earthing kit includes the appropriate number of earth leads and hardware, which helps provide the appropriate earth continuity. Throughout, the frame and cladding components are in compliance with EN60950 Clause 2.5.11. For V-LINE co-locate cabinet assemblies, one earth kit will be required per bay configuration.

## **Cabinet Accessories**

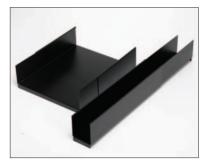

### **Enhanced Vertical Cable Manager Kit**

Developed to provide enhanced vertical cable management, these new cable manager kits have been designed specifically to complement the 29<sup>1</sup>/2" V-LINE<sup>™</sup> cabinet platform. The 2<sup>3</sup>/4" wide units can be fitted on the left hand and right hand side of the cabinets with the mounting rails positioned centrally. The 5<sup>1</sup>/2" wide units can only be fitted on the left or right to match the optional mounting rail offset configurations.

- Can factory fitted or easily retro-fitted in the field
- Split doors for improved operation and easy removal
- Integral cable tie lances and multiple mounting points for twist and lock cable management arms
- Steel material with UL 94V-0 black plastic components
- Black RAL 9005 epoxy polyester powder coat paint finish

## Horizontal Cable Manager Kit

Available in 19" and 23" mounting formats. These horizontal cable managers compliment the enhanced vertical managers to provide a complete cable management solution.

- Available in 1U, 2U and 3U heights
- Available in 19" and 23" mounting formats
- Can factory fitted or easily retro-fitted in the field
- Clip on cover allows cover to be hinged up or down or removed for easy access
- Steel material with UL 94V-0 black plastic components
- Black RAL 9005 epoxy polyester powder coat paint finish

### **Fixed Shelves**

**COOPER** B-Line

\_

Fixed shelves feature a flow-through perforated design for maximum equipment ventilation. These shelves feature adjustable shelf mounting brackets that adapt to all rail depths.

- All shelves are manufactured from 14 gauge (2.0mm) steel
- Universal EIA 310 D mounting
- Rated at 150lbs (68kg) evenly distributed
- Finished in Black RAL 9005 epoxy polyester powder coat paint

| UPC<br>Number | Cooper B-Line<br>Catalog Number | Overall<br>Shelf Depth<br>in. (mm) |     |
